Purchasing power parities (PPPs) are the rates of currency conversion that equalise the purchasing power of different currencies by eliminating the differences in price levels between countries.

In their simplest form, PPPs are simply price relatives which show the ratio of the prices in national currencies of the same good or service in different countries.

With the implementation of the new standards ESA2010 in September 2014 the time series was revised back to 1997, causing a structural break in the time series between 1996 and 1997.

As of May 2019 time series have been revised back to the year 1995, causing a structural break in series between 1994 and 1995.
