The gainfully employed population comprises any person who has worked for at least one hour per week during the month of November. Those temporarily absent during the survey period, for instance due to sick leave, are also included. The same definition is being used in the register-based labour market statistics (RAMS).

Some changes have been done as from 2004 years version regarding data over employment. A new source to identify entrepreneurs has been used as well as a minor adjustment to classify employees. For more information see [www.scb.se/vrke](http://www.scb.se/vrke).

Time series break. As from the beginning of 2011, changes have been made to the way gainfully employed persons are classified in the Labour statistics based on administrative sources (RAMS statistics). These changes only affect people who are 65 and older and lead to an increase in the number of gainfully employed persons in this age group. In addition, the upper age limit to be classified as gainfully employed has been changed from age 84 to age 74. This implies that there are no gainfully employed persons who are age 75 and older as of 2011. More information about the changes is available at [www.scb.se/rams](http://www.scb.se/rams).
