In 2009-2014 healthy newborns were included.

In 2015 only **private institutions with government mandate** are presented as 'private institutions with operating agreements'. These institutions are included in Health region West and Health region South-East. Other private institutions are presented as 'private institutions without operating agreements' and are not included in the region numbers. The affected variables cannot be compared with previous years. This table will be updated to ensure comparability.

As of 2018, outpatient consultations from contracted medical specialists are included in the figures.

. = Category not applicable. Figures do not exist at this time, because the category was not in use when the figures were collected.
contents:

Beds: From 2019 all somatic beds at health enterprises and private institutions with government mandate are classified as 'General hospitals'. In 2019 138 beds are reclassified as 'General hospitals' instead of 'Other somatic hospitals'.

Discharges: Cf. inpatient stays in the patient statistics.

Out-patient consultations: Break in time series for outpatient treatments at general hospitals due to change in routines of registration The Norwegian Directorate of Health.

Beds (per man-years): From 2008, statistics based on data from administrative registers are used for activity per man-years.

Discharges (per man-years): From 2008, statistics based on data from administrative registers are used for activity per man-years.

Bed-days (per man-years): From 2008, statistics based on data from administrative registers are used for activity per man-years.
