2022	50557.8	733583	68919

Legend/Footnotes

[1] Census Bureau midyear population estimate. BEA produced intercensal annual state population statistics for 2010 to 2019 that are tied to the Census Bureau decennial counts for 2010 and 2020. BEA developed intercensal population statistics because this data was not published when Census released state population data for 2020 through 2022, which are based on the 2020 decennial counts. BEA used the Census Bureau Das Gupta method (see <https://www2.census.gov/programs-surveys/popest/technical-documentation/methodology/intercensal/2000-2010-intercensal-estimates-methodology.pdf>), modified to account for an extra leap year day, to produce the intercensal population figures that will be used until Census releases its official intercensal population data.

[2] Per capita personal income is total personal income divided by total midyear population. BEA produced intercensal population figures for 2010 to 2019 that are tied to the Census Bureau decennial counts for 2010 and 2020 to create consistent time series that are used to prepare per capita personal income statistics. BEA used the Census Bureau Das Gupta method (see <https://www2.census.gov/programs-surveys/popest/technical-documentation/methodology/intercensal/2000-2010-intercensal-estimates-methodology.pdf>), modified to account for an extra leap year day, to produce the intercensal population figures that will be used until Census releases its official intercensal population data.

\* Estimates prior to 1950 are not available for Alaska and Hawaii.

Note. All dollar estimates are in millions of current dollars (not adjusted for inflation). Calculations are performed on unrounded data.

Last updated: March 31, 2023--new statistics for 2022; revised statistics for 2020-2021.
