Note that a level of education comprises both studies concluded with a degree and studies concluded without a degree, excluding postgraduate studies that only include persons with degrees. An education must cover no less than one term of full-time studies to enable level classification.

For further information on principles for classifying the level of education, see [www.scb.se/sun](http://www.scb.se/sun)

For the 2000 version, the Swedish Register of Education underwent extensive quality improvements which led to a break in the time series and this means that comparisons with previous versions of the register must be done very carefully!

1) SUN, the Swedish Educational Terminology, was adapted to the international terminology ISCED 97 (International Standard Classification of Education) with the new SUN 2000.

2) A number of new data sources were added to the register. The most important new sources were:

\*Total higher education points from 1993 from the Higher Education Register\*

\*Total KOMVUX (adult education) points from 1988\*

\*Foreign educational programmes which are recognised by the National Agency for Higher Education\*

\*The National Board of Health's register of healthcare and medical staff\*

Note that educational data might be incomplete for a small number of persons. It could concern people with degrees from abroad or with private degrees or with internal company-educations or people with old degrees.

level of education: The classification by level of educational attainment is according to the Swedish national educational classification (SUN)
