Figures in 2018 are temporary. Due to a change in the taxation of foreign pension schemes, an upwards shift in level occurs from 2016 to 2017. The change in level affects all types of income and income distributions, including the Gini coefficient.

Equivalised household income is computed by using the modified OECD equivalence scale.

List of Symbols:

.. Too uncertain to show or omitted due to discretion

... Data not available

number of adults: Adults are defined as persons aged 18 and over.

number of children: Children are defined as persons aged less than 18.
