Source: Statistics Iceland Labour force survey.

Please note that the annual statistics of the Labour Force Survey have been updated back in time in this table since the introduction of new weights and methods for population estimation, early in 2021.

Labour force includes employment and unemployment.

The relative standard error is over 20% for numbers under 1,000.

All numbers are rounded to the next hundred when greater than 50. Due to rounding, figures may not add up to totals and subtotals.

The data are classified according to the international classification of education ISCED 2011.

Latest update: 20211108 09:00

Units: Number

Reference period: 2003-2020
