Observed population figures that the forecast is partly based on are a recent <u>snapshot</u> from the population registry. This is a dynamic registry that is updated as required when changes are reported. The figures can therefore differ from population figures disseminated elsewhere in the statbank.

year: Population 1st July

probabilitylevel: Only calculated for 1-year ages of each sex.

For the summed values "Total (sex)" and "Total (age)" only the median is given.

probabilitylevel: population/median:

Forecast figures: median

Observed figures: population

Units: persons
