A person is defined as a child, regardless of age, when he/she is included in a household together with at least one of his/her parents and the child does not have any children or a partner in the same household. A parent-child relationship is created if a person is a biological parent, adoptive parent, guardian or "Other person" to someone in the household.

The model to estimate register-based household statistics changed in 2016. The statistics for the years 2011–2015 were also revised.

observations: Number of households: Type of household: Type of household gives the composition of the household and is broken down into Single (including Living alone), Cohabiting and Other household, all with or without children.

Latest update: 20220322 08:00
