

Real personal income and real personal Consumption Expenditures (PCE) by state (millions of constant 2012 dollars), 2008-2021

Bureau of Economic Analysis

Real personal income	Real personal income (millions of constant (2012) dollars) [1]	Real per capita personal income (constant (2012) dollars) [2]
2008	32874.4	47820
2009	32771.5	46890
2010	35717.2	50023
2011	36862.9	51021
2012	37973.4	51940
2013	37516.9	50832
2014	38785.7	52581
2015	39586.9	53559
2016	38320.5	51547
2017	38217.1	51509
2018	38939.2	52783
2019	39945.8	54361
2020	41161.8	56198
2021	40052.1	54666

Legend/Footnotes

[1] Real personal income for states is personal income divided by the RPPs and the national PCE price index. The result is a constant dollar (using 2012 as the base year) estimate of real personal income. Calculations are performed on unrounded data.

[2] Real per capita personal income for states is real personal income divided by total midyear population. BEA produced intercensal population statistics for 2010 to 2019 that are tied to the Census Bureau decennial counts for 2010 and 2020 to create consistent time series that are used to prepare per capita personal income statistics. BEA used the Census Bureau Das Gupta method (see <https://www2.census.gov/programs-surveys/popest/technical-documentation/methodology/intercensal/2000-2010-intercensal-estimates-methodology.pdf>), modified to account for an extra leap year day, to produce the intercensal population statistics that will be used until Census releases its official intercensal population data.

Last updated: December 15, 2022-- new statistics for 2021; revised statistics for 2010-2020.
