## Description

Difference between the population at the end of the year (measured on 1. January the following year) and in the beginning of the year (1. January). The figures are shown for county and municipality classification per 1.1.2024.

Two measures are available:

1. Number of persons
2. Percent growth, i.e. the population growth as a percentage of the population in the beginning of the year.

---

## Rationale for indicator

Many indicators are related to population. The population growth is part of this picture.

Roughly one third of the population growth in Norway is due to a surplus of births, while the remainder is attributed to net immigration.

---

## Source

Statistisk sentralbyrå (SSB)

---

## Collection

The figures come from Statistics Norway, and are based on data from the central population register.

---

## Interpretation and sources of error

Det er tatt hensyn til mindre grensejusteringer mellom kommuner i statistikken.

---

## Time periods

1990-2022

---

## Geographical level

Norway, counties, municipalities. City districts in Oslo, Bergen, Trondheim og Stavanger.
