Preliminary numbers.

Earnings are the remuneration an employee gets from the employer in exchange for labour or services.

Earnings are monthly earnings in thousand ISK.

Paid hours are monthly hours paid.

Data are based on the Icelandic Survey on Wages, Earnings and Labour Cost which is a sample survey.

Data are based on the following economic activities in the private sector: Manufacturing (C), Electricity, gas, steam, and air conditioning supply (D), Water supply; sewerage, waste management and remediation activities (E), Construction (F), Wholesale and retail trade; repair of motor vehicles (G), Transportation and storage (H), Information and communication (J), Financial and insurance activities (K). In the economic activity J small enterprises and enterprises in the IT business are missing.

In 2018 the economic activity Accommodation and food services (I) was added to the dataset. When comparing years it has to be kept in mind that the dataset has changed.

The economic activities Public administration and defence; compulsory social security (O), Education (P), and Human health and social work activities (Q) are only based on employees in the public sector. In O employees in the public sector are about 95% of the population, in P about 90% and 80% in Q. Employees in the public sector working in other economic activities are included in the dataset, most working in Arts, entertainment and recreation (R). A breakdown is not published for R as a sample from the private sector (about 50%) is missing.

Full-time employees are defined as employees whose total daytime hours are equal or exceed 90% of contractual working hours. Contractual working hours vary between collective agreements but are usually between 159.3 and 173.3 hours. It is worth mentioning that the shortening of the work week generally came into force for the private sector in 2020 but in 2021 for the public administration. See https://statice.is/publications/news-archive/wages-and-income/earnings-2020/

A minimum of 50 employees in 3 legal units are required in order to publish data on sub-groups.

Data is based on employees 18 years and older in the survey data.

Occupational group: Occupational groups follow the Ístarf95 classification (based on ISCO-88). In addition there are two occupational groups: Craft workers, defined as those belonging to occupational groups 7, 8 and 9 and having 5th digit (Icelandic addition) 2 and 3 (skilled craft workers and skilled foremen); general, machine and specialized workers, defined as those belonging to occupational groups 7, 8 and 9 and having the 5th digit 0 and 1 (general workers, and foremen).

Economic activity: Economic activities follow the Ísat08 classification (based on Nace rev.2.2).

Year: 2018: In 2018 the economic activity Accommodation and food services (I) was added to the dataset. This has to be kept in mind when comparing data between years as changes between years can partly be caused by different composition of the dataset.

In 2018 the economic activity Accommodation and food services (I) was added to the dataset. This has to be kept in mind when comparing data between years as changes between years can partly be caused by different composition of the dataset.

Earnings and working hours: Total earnings - full-time: Total earnings are the total remuneration per month including piece work, irregular bonuses and various other irregular payments, excluding payments in kind.

Information and communication (J): Small enterprises and enterprises in the IT business are missing.

Public administration and defence; compulsory social sec. (O): Only employees in the public sector are covered.

Education (P): Only employees in the public sector are covered.

Human health and social work activities (Q): Only employees in the public sector are covered.
