This time series was revised on 18 December 2020. The revision of the time series is part of the benchmark revision in Public Finance.

Government expenditure on health care, net: Household purchases of public health care is excluded.

Total government expenditure, net: Household purchases of public services is excluded.

Government expenditure on health care at constant prices, net: Deflated by price index of public consumption. At 2022 prices.

Household expenditure on health care at constant prices: Deflated by consumer price index of private health consumption. At 2022 prices.

The new COFOG classification was introduced in 1998, marking a break in the series where expenditure figures are not entirely comparable before and after the introduction.
