The table shows the number of households and persons by type of household and age of the youngest child in the household.

A person is defined as a child, regardless of age, when he/she is included in a household together with at least one of his/her parents and the child does not have any children or a partner in the same household.

A parent-child relationship is created if a person is a biological parent, adoptive parent, guardian or "Other person" to someone in the household.

observations: Number of persons: Type of household:

Type of household gives the composition of the household and is broken down into Single (including Living alone), Cohabiting and Other household, all with or without children.
