2017	28	25	3

The International Classification of Diseases (ICD) ICD-10, B20.

From 1985-2000, it was obligatory to report AIDS, which is the end stage of HIV infection. From 2000 reporting of AIDS is voluntary, as a completion to the reporting of HIV. Screening affects the number of newly-reported cases and how many people develop AIDS. Included in the total may be cases where information about gender is missing

reporting country: Greenland

HIV only
