

**B17001C: POVERTY STATUS IN THE PAST 12 MONTHS BY SEX BY AGE (AMERICAN INDIAN AND ALASKA NATIVE ALONE)**

Universe: American Indian and Alaska Native alone population for whom poverty status is determined

2018 American Community Survey, 1-Year Estimates

	Alaska	
	Estimate	Margin of Error
Total:	107,926	+/-3,749
Income in the past 12 months below poverty level:	24,632	+/-2,798
Male:	13,067	+/-1,636
Under 5 years	1,667	+/-393
5 years	248	+/-155
6 to 11 years	1,720	+/-479
12 to 14 years	605	+/-201
15 years	263	+/-118
16 and 17 years	390	+/-179
18 to 24 years	1,621	+/-425
25 to 34 years	2,221	+/-630
35 to 44 years	1,663	+/-537
45 to 54 years	1,092	+/-391
55 to 64 years	1,204	+/-335
65 to 74 years	269	+/-108
75 years and over	104	+/-78
Female:	11,565	+/-1,438
Under 5 years	1,437	+/-362
5 years	398	+/-167
6 to 11 years	1,403	+/-361
12 to 14 years	634	+/-235
15 years	295	+/-149
16 and 17 years	612	+/-271
18 to 24 years	1,288	+/-375
25 to 34 years	2,277	+/-463
35 to 44 years	1,199	+/-387
45 to 54 years	928	+/-275
55 to 64 years	679	+/-180
65 to 74 years	264	+/-166
75 years and over	151	+/-116
Income in the past 12 months at or above poverty level:	83,294	+/-4,212
Male:	39,522	+/-2,560
Under 5 years	3,220	+/-623
5 years	801	+/-270
6 to 11 years	4,166	+/-641
12 to 14 years	2,342	+/-549
15 years	845	+/-249
16 and 17 years	1,309	+/-347
18 to 24 years	3,973	+/-721
25 to 34 years	5,654	+/-826
35 to 44 years	4,832	+/-706
45 to 54 years	3,990	+/-711
55 to 64 years	3,727	+/-468
65 to 74 years	3,240	+/-489
75 years and over	1,423	+/-333
Female:	43,772	+/-2,355
Under 5 years	3,525	+/-560
5 years	925	+/-397
6 to 11 years	4,211	+/-919
12 to 14 years	1,951	+/-499
15 years	565	+/-212
16 and 17 years	1,249	+/-332
18 to 24 years	5,031	+/-738
25 to 34 years	6,472	+/-659
35 to 44 years	5,098	+/-890
45 to 54 years	4,116	+/-618
55 to 64 years	5,548	+/-871
65 to 74 years	3,449	+/-480
75 years and over	1,632	+/-305

Source: U.S. Census Bureau, 2018 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation ). The effect of nonsampling error is not represented in these tables.

While the 2018 American Community Survey (ACS) data generally reflect the July 2015 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas, in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineations due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

#### Explanation of Symbols:

An "\*\*\*" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An "-" entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution, or the margin of error associated with a median was larger than the median itself.

An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution.

An "\*\*\*" entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An "\*\*\*\*\*" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An "N" entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An "(X)" means that the estimate is not applicable or not available.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.
