

**B12002: SEX BY MARITAL STATUS BY AGE FOR THE POPULATION 15 YEARS AND OVER**

Universe: Population 15 years and over

2018 American Community Survey, 1-Year Estimates

	Alaska	
	Estimate	Margin of Error
Total:	582,974	+/-828
Male:	304,543	+/-1,457
Never married:	113,521	+/-3,346
15 to 17 years	14,664	+/-823
18 and 19 years	9,968	+/-967
20 to 24 years	24,537	+/-1,292
25 to 29 years	22,947	+/-1,863
30 to 34 years	11,330	+/-1,242
35 to 39 years	8,954	+/-1,130
40 to 44 years	4,980	+/-1,191
45 to 49 years	3,964	+/-781
50 to 54 years	3,082	+/-666
55 to 59 years	3,807	+/-967
60 to 64 years	2,483	+/-643
65 to 74 years	2,025	+/-581
75 to 84 years	580	+/-265
85 years and over	200	+/-220
Now married:	154,883	+/-4,171
Married, spouse present:	131,725	+/-4,278
15 to 17 years	113	+/-191
18 and 19 years	53	+/-83
20 to 24 years	2,898	+/-804
25 to 29 years	8,555	+/-1,535
30 to 34 years	11,951	+/-1,291
35 to 39 years	14,177	+/-1,800
40 to 44 years	12,706	+/-1,670
45 to 49 years	12,648	+/-1,301
50 to 54 years	14,010	+/-1,456
55 to 59 years	13,024	+/-1,791
60 to 64 years	14,834	+/-1,539
65 to 74 years	18,852	+/-1,399
75 to 84 years	6,440	+/-810
85 years and over	1,464	+/-758

Source: U.S. Census Bureau, 2018 American Community Survey 1-Year Estimates

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation ). The effect of nonsampling error is not represented in these tables.

While the 2018 American Community Survey (ACS) data generally reflect the July 2015 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas, in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineations due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

An "\*\*\*" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

An "-" entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution, or the margin of error associated with a median was larger than the median itself.

An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution.

An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution.

An "\*\*\*\*" entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

An "\*\*\*\*\*" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

An "N" entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

An "(X)" means that the estimate is not applicable or not available.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.
