This statistics apply the regional division of 1 January 2020.

Free-time residences are not included in the building stock. The intended use of a building is determined according to the purpose for which the largest part of the gross floor area of the building is used. Information about change in heating fuel is mainly transmitted to the Population Information System only if such alterations have been done to a building which require a building permit.

Latest update: 20200527 08:00
