

B02014: AMERICAN INDIAN AND ALASKA NATIVE ALONE FOR SELECTED TRIBAL GROUPINGS
Universe: People who are American Indian and Alaska Native alone and people with no tribe reported
2019 American Community Survey 5-Years Estimates

	Alaska	
Label	Estimate	Margin of Error
Total:	109 751	±1,660
American Indian tribes, specified:	6 046	±773
Apache	255	±166
Arapaho	153	±226
Blackfeet	96	±58
Canadian and French American Indian	199	±138
Central American Indian	0	±22
Cherokee	1 069	±349
Cheyenne	13	±18
Chickasaw	5	±7
Chippewa	667	±347
Choctaw	523	±220
Colville	55	±81
Comanche	36	±38
Cree	0	±22
Creek	7	±10
Crow	12	±21
Delaware	5	±7
Hopi	79	±128
Houma	77	±111
Iroquois	95	±77
Kiowa	0	±22
Lumbee	0	±22
Menominee	38	±48
Mexican American Indian	219	±144
Navajo	121	±60
Osage	5	±8
Ottawa	9	±11
Paiute	17	±13
Pima	3	±3
Potawatomi	83	±87
Pueblo	108	±87
Puget Sound Salish	105	±87
Seminole	26	±19
Shoshone	62	±79
Sioux	408	±171
South American Indian	97	±68
Spanish American Indian	20	±31
Tohono O'Odham	4	±6
Ute	22	±19
Yakama	14	±14
Yaqui	54	±50
Yuman	0	±22
All other American Indian tribes (with only one tribe reported)	1 285	±354
American Indian tribes, not specified	597	±192
Alaska Native tribes, specified:	91 206	±1,986
Alaskan Athabascan	13 989	±953
Aleut	9 090	±930
Inupiat	23 566	±1,073
Tlingit-Haida	8 340	±587
Tsimshian	1 546	±182
Yup'ik	34 675	±1,391
Alaska Native tribes, not specified	8 897	±847
American Indian or Alaska Native tribes, not specified	0	±22
Two or More American Indian or Alaska Native Tribes	3 005	±622

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Source: U.S. Census Bureau, 2015-2019 American Community Survey 5-Year Estimates

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.

Total includes people who reported American Indian or Alaska Native only, regardless of whether they reported one or more American Indian or Alaska Native tribes or tribal groupings.

All Other American Indian Tribes (with only one tribe reported). Includes respondents who provide a response of another American Indian tribe not shown separately, such as Abenaki, Catawba, Eastern Tribes, Kickapoo, Mattaponi, Quapaw, Shawnee, or Yuchi.

American Indian Tribes, not specified. Includes people who provide a generic term such as "American Indian" or tribal groupings not elsewhere classified.

Alaska Native Tribes, not specified. Includes people who provide a generic term such as "Alaska Indian" or "Alaska Native" or tribal groupings not elsewhere classified.

American Indian Tribes or Alaska Native Tribes, not specified. Includes respondents who checked the American Indian or Alaska Native response category on the ACS questionnaire and did not write in a specific group or wrote in a generic term such as "American Indian or Alaska Native."

Two or more American Indian or Alaska Native Tribes. Includes respondents who provided multiple American Indian or Alaska Native Tribes responses such as Blackfeet and Pueblo; or Alaskan Athabascan and Tlingit-Haida; or Paiute and Aleut.

The 2015-2019 American Community Survey (ACS) data generally reflect the September 2018 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas. In certain instances, the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineation lists due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols: * An "***" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

* An "-" entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution, or the margin of error associated with a median was larger than the median itself.

* An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution.

* An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution.

* An "***" entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

* An "*****" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

* An "N" entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

* An "(X)" means that the estimate is not applicable or not available.
