

B12002: SEX BY MARITAL STATUS BY AGE FOR THE POPULATION 15 YEARS AND OVER

Universe: Population 15 years and over

2019 American Community Survey, 1-Year Estimates Detailed Tables

	Alaska	
Label	Estimate	Margin of Error
Total:	578 225	±856
Male:	301 975	±1,721
Never married:	113 828	±3,902
15 to 17 years	14 540	±984
18 and 19 years	10 865	±1,470
20 to 24 years	22 392	±1,756
25 to 29 years	22 681	±2,132
30 to 34 years	11 546	±2,075
35 to 39 years	8 136	±1,412
40 to 44 years	4 525	±1,125
45 to 49 years	4 002	±878
50 to 54 years	4 338	±999
55 to 59 years	4 068	±1,102
60 to 64 years	2 530	±675
65 to 74 years	3 553	±811
75 to 84 years	610	±293
85 years and over	42	±56
Now married:	149 285	±4,386
Married, spouse present:	127 863	±4,122
15 to 17 years	0	±163
18 and 19 years	109	±191
20 to 24 years	2 935	±1,045
25 to 29 years	8 203	±1,524
30 to 34 years	14 449	±1,647
35 to 39 years	13 704	±1,563
40 to 44 years	12 111	±1,515
45 to 49 years	10 112	±1,177
50 to 54 years	13 349	±1,500
55 to 59 years	13 368	±1,397
60 to 64 years	13 530	±1,734
65 to 74 years	18 834	±1,232
75 to 84 years	6 055	±757
85 years and over	1 104	±434
Married, spouse absent:	21 422	±2,188
Separated:	4 594	±1,139
15 to 17 years	56	±93
18 and 19 years	0	±163
20 to 24 years	24	±46
25 to 29 years	184	±237
30 to 34 years	421	±282
35 to 39 years	223	±164
40 to 44 years	796	±588
45 to 49 years	450	±324
50 to 54 years	574	±385
55 to 59 years	874	±777
60 to 64 years	286	±201
65 to 74 years	686	±565
75 to 84 years	20	±25
85 years and over	0	±163
Other:	16 828	±1,980
15 to 17 years	123	±201
18 and 19 years	173	±166
20 to 24 years	901	±453
25 to 29 years	375	±211
30 to 34 years	2 551	±1,136

85 years and over	577	±475

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states. Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Source: U.S. Census Bureau, 2019 American Community Survey 1-Year Estimates

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.

The 2019 American Community Survey (ACS) data generally reflect the September 2018 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas. In certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineations due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols: * An "***" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

* An "-" entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution, or the margin of error associated with a median was larger than the median itself.

* An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution.

* An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution.

* An "****" entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

* An "*****" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

* An "N" entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

* An "(X)" means that the estimate is not applicable or not available.
