

B27002: PRIVATE HEALTH INSURANCE STATUS BY SEX BY AGE
Universe: Civilian noninstitutionalized population
2019 American Community Survey, 1-Year Estimates

	Alaska	
Label	Estimate	Margin of Error
Total:	705 772	±2,037
Male:	359 167	±2,922
Under 6 years:	30 603	±1,964
With private health insurance	17 086	±1,835
No private health insurance	13 517	±1,641
6 to 18 years:	67 971	±2,067
With private health insurance	40 586	±2,912
No private health insurance	27 385	±2,575
19 to 25 years:	32 386	±2,390
With private health insurance	20 717	±2,019
No private health insurance	11 669	±1,932
26 to 34 years:	48 011	±2,754
With private health insurance	29 517	±2,567
No private health insurance	18 494	±2,094
35 to 44 years:	43 357	±1,724
With private health insurance	30 434	±1,857
No private health insurance	12 923	±1,739
45 to 54 years:	44 974	±2,279
With private health insurance	32 933	±2,705
No private health insurance	12 041	±1,806
55 to 64 years:	47 777	±1,305
With private health insurance	32 373	±1,812
No private health insurance	15 404	±1,787
65 to 74 years:	31 796	±1,545
With private health insurance	19 115	±1,412
No private health insurance	12 681	±1,668
75 years and over:	12 292	±593
With private health insurance	8 303	±750
No private health insurance	3 989	±783
Female:	346 605	±2,327
Under 6 years:	31 301	±1,811
With private health insurance	17 636	±1,680
No private health insurance	13 665	±1,654
6 to 18 years:	60 127	±1,903
With private health insurance	35 225	±2,012
No private health insurance	24 902	±2,393
19 to 25 years:	29 329	±2,197
With private health insurance	19 567	±1,860
No private health insurance	9 762	±1,537
26 to 34 years:	48 164	±2,134
With private health insurance	29 526	±1,828
No private health insurance	18 638	±2,102
35 to 44 years:	45 001	±1,509
With private health insurance	33 371	±1,912
No private health insurance	11 630	±1,738
45 to 54 years:	41 504	±1,751
With private health insurance	30 133	±1,648
No private health insurance	11 371	±1,760
55 to 64 years:	46 332	±1,371
With private health insurance	33 336	±1,387
No private health insurance	12 996	±1,379
65 to 74 years:	29 640	±1,151
With private health insurance	19 637	±1,527
No private health insurance	10 003	±1,313
75 years and over:	15 207	±1,053
With private health insurance	7 908	±1,064
No private health insurance	7 299	±1,027

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Source: U.S. Census Bureau, 2019 American Community Survey 1-Year Estimates

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.

Logical coverage edits applying a rules-based assignment of Medicaid, Medicare and military health coverage were added as of 2009 -- please see https://www.census.gov/library/working-papers/2010/demo/coverage_edits_final.html for more details. Select geographies of 2008 data comparable to the 2009 and later tables are available at <https://www.census.gov/data/tables/time-series/acs/1-year-re-run-health-insurance.html>. The health insurance coverage category names were modified in 2010. See https://www.census.gov/topics/health/health-insurance/about/glossary.html#par_textimage_18 for a list of the insurance type definitions.

Beginning in 2017, selected variable categories were updated, including age-categories, income-to-poverty ratio (IPR) categories, and the age universe for certain employment and education variables. See user note entitled "Health Insurance Table Updates" for further details.

The 2019 American Community Survey (ACS) data generally reflect the September 2018 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas. In certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineations due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols: * An "***" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

* An "-" entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution, or the margin of error associated with a median was larger than the median itself.

* An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution.

* An "+" following a median estimate means the median falls in the upper interval of an open-ended distribution.

* An "****" entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

* An "*****" entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.

* An "N" entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

* An "(X)" means that the estimate is not applicable or not available.
