Delineations :

The population is delimited to so-called full-year households, which refers to households where the adults have been registered in Sweden at both the beginning and the end of the year. Read more about the delimitations in the statistics quality declaration on the Statistics Sweden website.

Incomes in fixed prices, referring to last year of data.

Incomes :

Incomes refers to household incomes. Incomes are equivalised, which means that the household income is adjusted for household size by using a weight system.

Wage and business income: Wage is the sum of wage payments during the year. Sickness benefit paid for by the employer is included in wage. Business income is calculated as surplus or deficit of business activities.

Capital: Capital is interest, dividends, capital gains and capital losses. Capital gains and losses consists of the gains or losses arising from the realization of assets, e.g. shares, funds or real estate.

Pension: Pensions are taxable pensions and consist of national retirement pension, occupational pension and private pension.

Sickness and activity compensation: Taxable benefits for people with illness or disability that means reduced or no ability to work.

Sickness compensation, parental allowance, labour market assistance etc: Taxable positive transfers, such as compensation for sickness, parental allowance and labour market assistance. Also includes other taxable transfers such as care allowance and education allowance for PhD students.
