Gainful employment rate - gainfully employed persons as a percent of the population of the municipality in the age group (here aged 20–64).

Time series break. As from reference year 2019, a new data source and method are used to produce the statistics. The monthly employer reports at individual level (AGI) have replaced the annual statements of earnings (KU) and gainfully employed persons are now classified based on wages/salaries paid in November. Further information on the changes is available at www.scb.se/rams
