Geography name: Division No. 11

Province or territory abbreviation: N.L.

Dissemination Geography Unique Identifier (DGUID): 2021A00031011

Alternative geographic code: 1011

Province or territory geocode: 10

Short-form total non-response rate: 22.3

Data quality flag: 02000

Data quality note: ...

Footnotes:

[1] Historical comparison of geographic areas

The boundaries and names of census geographies can change from one census to the next. In order to facilitate data comparisons between censuses, previous census data have been adjusted to reflect as closely as possible the 2021 boundaries of these areas. The methodology used for this adjustment involved spatially linking blocks of previous censuses. A previous census block was linked to the 2021 area within which its representative point fell. A limited number of interactive linkages were completed to further enhance the adjustment in certain areas. For some census geographies, it was not possible to reflect the 2021 boundaries. The 2021 boundaries may not be reflected as there was no previous census block to assign to the 2021 area. As well previous census data for some 2021 areas may not be available due to the fact that the concordance did not produce an accurate representation of the 2021 area.

[2] Gender

Gender refers to an individual's personal and social identity as a man, woman or non-binary person (a person who is not exclusively a man or a woman).

Gender includes the following concepts: gender identity, which refers to the gender that a person feels internally and individually

[3] Given that the non-binary population is small, data aggregation to a two-category gender variable is sometimes necessary to protect the confidentiality of responses provided. In these cases, individuals in the category "non-binary persons" are distributed into the other two gender categories and are denoted by the "+" symbol. The sex variable in census years prior to 2021 and the two-category gender variable in the 2021 Census are included together in the [data table]. Although sex and gender refer to two different concepts, the introduction of gender is not expected to have a significant impact on data analysis and historical comparability, given the small size of the transgender and non-binary populations. For additional information on changes of concepts over time, please consult the Age, Sex at Birth and Gender Reference Guide.

[4] Age

Age refers to the age of a person (or subject) of interest at last birthday (or relative to a specified, well-defined reference date).

[5] Prior to the 2021 Census, this category refers to males. Starting in 2021, this category includes men and boys, as well as some non-binary persons.

[6] Prior to the 2021 Census, this category refers to females. Starting in 2021, this category includes women and girls, as well as some non-binary persons.
