Geography name: Division No. 10

Data quality note: ...

Footnotes:

[1] Gender

Gender refers to an individual's personal and social identity as a man, woman or non-binary person (a person who is not exclusively a man or a woman).

Gender includes the following concepts: gender identity, which refers to the gender that a person feels internally and individually

[2] Given that the non-binary population is small, data aggregation to a two-category gender variable is sometimes necessary to protect the confidentiality of responses provided. In these cases, individuals in the category "non-binary persons" are distributed into the other two gender categories and are denoted by the "+" symbol.

[3] Structural type of dwelling

Structural type refers to the structural characteristics and/or dwelling configuration, that is, whether the dwelling is a single-detached house, an apartment in a high-rise building, a row house, a mobile home, etc.

[4] Age

Age refers to the age of a person (or subject) of interest at last birthday (or relative to a specified, well-defined reference date).

[5] The category 'Movable dwelling' includes mobile homes and other movable dwellings such as houseboats, recreational vehicles and railroad cars.
