

B19130: AGGREGATE FAMILY INCOME IN THE PAST 12 MONTHS (IN 2020 INFLATION-ADJUSTED DOLLARS) BY FAMILY TYPE BY AGE OF HOUSEHOLDER

Universe: Families

2020 American Community Survey, 5-Year Estimates Detailed Tables

	Alaska	
	Estimate	Margin of Error
Aggregate family income in the past 12 months (in 2020 inflation-adjusted dollars):	18 869 586 100	±316,485,075
Married couple family (dollars):	16 102 263 800	±312,184,116
Householder 15 to 24 years (dollars)	189 743 300	±32,378,762
Householder 25 to 34 years (dollars)	2 164 662 600	±131,870,062
Householder 35 to 44 years (dollars)	3 588 414 500	±168,239,758
Householder 45 to 54 years (dollars)	3 879 023 700	±176,707,115
Householder 55 to 59 years (dollars)	1 993 932 700	±147,188,914
Householder 60 to 64 years (dollars)	1 730 409 100	±116,194,092
Householder 65 to 74 years (dollars)	1 973 900 900	±119,566,716
Householder 75 years and over (dollars)	582 177 000	±57,996,891
Other family (dollars):	2 767 322 300	±121,927,868
Male householder, no spouse present (dollars):	1 144 286 100	±81,711,132
Householder 15 to 24 years (dollars)	27 654 400	±9,991,242
Householder 25 to 34 years (dollars)	181 348 400	±25,255,666
Householder 35 to 44 years (dollars)	217 027 400	±30,805,134
Householder 45 to 54 years (dollars)	332 865 200	±55,042,920
Householder 55 to 59 years (dollars)	145 293 600	±40,139,671
Householder 60 to 64 years (dollars)	82 343 200	±23,746,444
Householder 65 to 74 years (dollars)	99 579 200	±17,966,914
Householder 75 years and over (dollars)	58 174 700	±20,851,798
Female householder, no spouse present (dollars):	1 623 036 200	±86,009,718
Householder 15 to 24 years (dollars)	43 139 900	±9,064,505
Householder 25 to 34 years (dollars)	251 062 100	±34,365,677
Householder 35 to 44 years (dollars)	327 821 500	±35,246,818
Householder 45 to 54 years (dollars)	395 167 300	±46,287,561
Householder 55 to 59 years (dollars)	173 218 700	±33,544,638
Householder 60 to 64 years (dollars)	122 215 900	±27,434,502
Householder 65 to 74 years (dollars)	185 347 900	±30,414,479
Householder 75 years and over (dollars)	125 063 100	±31,664,072

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2020, the 2020 Census provides the official counts of the population and housing units for the nation, states, counties, cities, and towns. For 2016 to 2019, the Population Estimates Program provides estimates of the population for the nation, states, counties, cities, and towns and intercensal housing unit estimates for the nation, states, and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Source: U.S. Census Bureau, 2016-2020 American Community Survey 5-Year Estimates

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.

Between 2018 and 2019 the American Community Survey retirement income question changed. These changes resulted in an increase in both the number of households reporting retirement income and higher aggregate retirement income at the national level. For more information see Changes to the Retirement Income Question .

The categories for relationship to householder were revised in 2019. For more information see Revisions to the Relationship to Household item.

The 2016-2020 American Community Survey (ACS) data generally reflect the September 2018 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas. In certain instances, the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineation lists due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

- The estimate could not be computed because there were an insufficient number of sample observations. For a ratio of medians estimate, one or both of the median estimates falls in the lowest interval or highest interval of an open-ended distribution.

N The estimate or margin of error cannot be displayed because there were an insufficient number of sample cases in the selected geographic area.

(X) The estimate or margin of error is not applicable or not available.

median- The median falls in the lowest interval of an open-ended distribution (for example "2,500-")

median+ The median falls in the highest interval of an open-ended distribution (for example "250,000+").

** The margin of error could not be computed because there were an insufficient number of sample observations.

*** The margin of error could not be computed because the median falls in the lowest interval or highest interval of an open-ended distribution.

***** A margin of error is not appropriate because the corresponding estimate is controlled to an independent population or housing estimate. Effectively, the corresponding estimate has no sampling error and the margin of error may be treated as zero.
