## B19131: FAMILY TYPE BY PRESENCE OF OWN CHILDREN UNDER 18 YEARS BY FAMILY INCOME IN THE PAST 12 MONTHS (IN 2020 INFLATION-ADJUSTED DOLLARS) Universe: Families

2020 American Community Survey, 5-Year Estimates Detailed Tables

	Alaska	
	Estimate	Margin of Error
Total:	167 815	$\pm 1,899$
Married-couple family:	127 312	$\pm 1,948$
With own children of the householder under 18 years:	55 027	$\pm 1,369$
Less than \$10,000	352	±104
\$10,000 to \$14,999 \$15,000 to \$14,999	403	±155
\$15,000 to \$19,999	400	±114 +162
\$20,000 to \$24,999	841	+226
\$25,000 to \$29,999	1 092	+190
\$35,000 to \$39,999	1 244	+312
\$40,000 to \$44,999	1412	±279
\$45,000 to \$49,999	1 187	±221
\$50,000 to \$59,999	3 021	±388
\$60,000 to \$74,999	5 466	±472
\$75,000 to \$99,999	8 127	±713
\$100,000 to \$124,999	8 498	$\pm 658$
\$125,000 to \$149,999	6 3 8 3	±574
\$150,000 to \$199,999	8 476	±643
\$200,000 or more	7 477	±528
No own children of the householder under 18 years:	72 285	±1,461
Less than \$10,000	694	±146
\$10,000 to \$14,999	6/8	±207
\$15,000 to \$19,999	910	±190
\$20,000 to \$24,999 \$25,000 to \$24,999	932	±181 +273
\$25,000 to \$2 <i>9,999</i>	1 545	+248
\$35,000 to \$34,999	1 650	+306
\$55,000 to \$44 999	1 763	+258
\$45,000 to \$49,999	2 172	±417
\$50,000 to \$59,999	4 071	±466
\$60,000 to \$74,999	7 960	±693
\$75,000 to \$99,999	10614	±584
\$100,000 to \$124,999	10 499	$\pm 698$
\$125,000 to \$149,999	7 972	$\pm 668$
\$150,000 to \$199,999	9914	$\pm 638$
\$200,000 or more	9 800	$\pm 699$
Other family:	40 503	±1,212
Male householder, no spouse present:	14 293	±/58
With own children of the householder under 18 years:	/ 812	±562
\$10,000 to \$14,000	108	±175 +96

\$125.000 to \$149.999	715	±218
\$150,000 to \$199,999	647	±145
\$200.000 or more	315	±103

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2020, the 2020 Census provides the official counts of the population and housing units for the nation, states, counties, cities, and towns. For 2016 to 2019, the Population Estimates Program provides estimates of the population for the nation, states, counties, cities, and towns and intercensal housing unit estimates for the nation, states, and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section. Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.

Between 2018 and 2019 the American Community Survey retirement income question changed. These changes resulted in an increase in both the number of households reporting retirement income and higher aggregate retirement income at the national level. For more information see Changes to the Retirement Income Question .

The categories for relationship to householder were revised in 2019. For more information see Revisions to the Relationship to Household item.

The 2016-2020 American Community Survey (ACS) data generally reflect the September 2018 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas. In certain instances, the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineation lists due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

- The estimate could not be computed because there were an insufficient number of sample observations. For a ratio of medians estimate, one or both of the median estimates falls in the lowest interval or highest interval of an open-ended distribution.

N The estimate or margin of error cannot be displayed because there were an insufficient number of sample cases in the selected geographic area.

(X) The estimate or margin of error is not applicable or not available.

median- The median falls in the lowest interval of an open-ended distribution (for example "2,500-")

median+ The median falls in the highest interval of an open-ended distribution (for example "250,000+").

\*\* The margin of error could not be computed because there were an insufficient number of sample observations.

\*\*\* The margin of error could not be computed because the median falls in the lowest interval or highest interval of an open-ended distribution.

\*\*\*\*\* A margin of error is not appropriate because the corresponding estimate is controlled to an independent population or housing estimate. Effectively, the corresponding estimate has no sampling error and the margin of error may be treated as zero.
