

B25011: TENURE BY HOUSEHOLD TYPE (INCLUDING LIVING ALONE) AND AGE OF HOUSEHOLDER

Universe: Occupied housing units

2020 American Community Survey, 5-Year Estimates

	Alaska	
	Estimate	Margin of Error
Total:	255 173	±1,326
Owner occupied:	165 376	±1,894
Family households:	119 711	±1,848
Married-couple family:	98 013	±1,832
Householder 15 to 34 years	12 102	±891
Householder 35 to 64 years	64 275	±1,516
Householder 65 years and over	21 636	±776
Other family:	21 698	±922
Male householder, no spouse present:	8 181	±554
Householder 15 to 34 years	987	±183
Householder 35 to 64 years	5 639	±457
Householder 65 years and over	1 555	±274
Female householder, no spouse present:	13 517	±733
Householder 15 to 34 years	1 641	±277
Householder 35 to 64 years	8 398	±594
Householder 65 years and over	3 478	±393
Nonfamily households:	45 665	±1,516
Householder living alone:	37 160	±1,339
Householder 15 to 34 years	2 982	±428
Householder 35 to 64 years	18 568	±868
Householder 65 years and over	15 610	±820
Householder not living alone:	8 505	±594
Householder 15 to 34 years	2 203	±361
Householder 35 to 64 years	4 598	±431
Householder 65 years and over	1 704	±226
Renter occupied:	89 797	±1,820
Family households:	48 104	±1,568
Married-couple family:	29 299	±1,310
Householder 15 to 34 years	13 588	±839
Householder 35 to 64 years	14 017	±890
Householder 65 years and over	1 694	±312
Other family:	18 805	±816
Male householder, no spouse present:	6 112	±573
Householder 15 to 34 years	2 422	±394
Householder 35 to 64 years	3 267	±435
Householder 65 years and over	423	±135
Female householder, no spouse present:	12 693	±736
Householder 15 to 34 years	5 451	±491
Householder 35 to 64 years	6 759	±624
Householder 65 years and over	483	±110
Nonfamily households:	41 693	±1,384
Householder living alone:	29 873	±1,236
Householder 15 to 34 years	9 129	±828
Householder 35 to 64 years	14 086	±834
Householder 65 years and over	6 658	±566
Householder not living alone:	11 820	±781
Householder 15 to 34 years	7 810	±701
Householder 35 to 64 years	3 690	±387
Householder 65 years and over	320	±106

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2020, the 2020 Census provides the official counts of the population and housing units for the nation, states, counties, cities, and towns. For 2016 to 2019, the Population Estimates Program provides estimates of the population for the nation, states, counties, cities, and towns and intercensal housing unit estimates for the nation, states, and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Source: U.S. Census Bureau, 2016-2020 American Community Survey 5-Year Estimates

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.

The categories for relationship to householder were revised in 2019. For more information see Revisions to the Relationship to Household item. The 2016-2020 American Community Survey (ACS) data generally reflect the September 2018 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas. In certain instances, the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineation lists due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

- The estimate could not be computed because there were an insufficient number of sample observations. For a ratio of medians estimate, one or both of the median estimates falls in the lowest interval or highest interval of an open-ended distribution.

N The estimate or margin of error cannot be displayed because there were an insufficient number of sample cases in the selected geographic area.

(X) The estimate or margin of error is not applicable or not available.

median- The median falls in the lowest interval of an open-ended distribution (for example "2,500-").

median+ The median falls in the highest interval of an open-ended distribution (for example "250,000+").

** The margin of error could not be computed because there were an insufficient number of sample observations.

*** The margin of error could not be computed because the median falls in the lowest interval or highest interval of an open-ended distribution.

***** A margin of error is not appropriate because the corresponding estimate is controlled to an independent population or housing estimate.

Effectively, the corresponding estimate has no sampling error and the margin of error may be treated as zero.
