

Household income statistics by household type, Data Tables, 2021

Universe: Private households in occupied private dwellings, 2021 and 2016 censuses — 100% data

Household size (2) Household income statistics	Yukon					
	Number of households		Total - Households by household size		Median household	Median household
	(2021)	(2016)	total income	total income	after-tax income	after-tax income
	(3, 4, 5)		(2020)	(2015)	(2020)	(2015)
			(2020 constant dollars)	(2020 constant dollars)	(2020 constant dollars)	(2020 constant dollars)
Household type including census family structure						
Total – Household type including census family structure (6)	17,185	15,215	100,000	92,000	88,000	80,000
Census-family households	10,625	9,595	133,000	122,000	115,000	106,000
Households consisting of only one census family without additional persons	9,465	8,630	128,000	118,000	111,000	103,000
One couple, with or without children in their census family	7,860	7,165	141,000	131,000	121,000	113,000
Without children	4,180	3,725	121,000	114,000	105,000	99,000
With children	3,685	3,440	162,000	149,000	140,000	128,000
One one-parent census family	1,605	1,470	79,500	66,500	73,500	62,000
With a parent that is a man+ (7, 8)	405	370	84,000	73,500	75,000	66,000
With a parent that is a woman+ (9, 10)	1,200	1,100	78,000	64,500	72,500	60,800
Other census family households (11)	1,155	960	182,000	148,000	160,000	131,000
Non-census family households	6,560	5,620	58,800	50,400	52,800	46,000

Abbreviation notes:

Geography name: Yukon

Short-form total non-response rate: 4.3

Data quality flag: 00010

Data quality note: ..."

Footnotes:

[1] The boundaries and names of census geographies can change from one census to the next. In order to facilitate data comparisons between censuses, previous census data have been adjusted to reflect as closely as possible the 2021 boundaries of these areas. The methodology used for this adjustment involved spatially linking blocks of previous censuses (concordance to the 1996 Census used the 1996 enumeration areas to the 2021 boundaries). A previous census block was linked to the 2021 area within which its representative point fell. A limited number of interactive linkages were completed to further enhance the adjustment in certain areas. For some census geographies, it was not possible to reflect the 2021 boundaries. The 2021 boundaries may not be reflected as there was no previous census block to assign to the 2021 area. As well previous census data for some 2021 areas may not be available due to the fact that the concordance did not produce an accurate representation of the 2021 area.

[2] Household size

'Household size' refers to the number of persons in a private household.

[3] Total income refers to the sum of certain incomes (in cash and, in some circumstances, in kind) of the statistical unit during a specified reference period. The components used to calculate total income vary between: – Statistical units of social statistical programs such as persons, private households, census families and economic families, employers' contributions to registered pension plans, Canada Pension Plan, Québec Pension Plan and Employment Insurance, voluntary inter-household transfers, imputed rent, goods and services produced for barter and goods produced for own consumption."

[4] After-tax income refers to total income less income taxes of the statistical unit during a specified reference period. Income taxes refers to the sum of federal income taxes, provincial and territorial income taxes, less abatement where applicable. Provincial and territorial income taxes include health care premiums in certain jurisdictions. Abatement reduces the federal income taxes payable by persons residing in Quebec or in certain self-governing Yukon First Nation settlement lands.

[5] The median income of a specified group is the amount that divides the income distribution of that group into two halves, i.e., the incomes of half of the units in that group are below the median, while those of the other half are above the median. Median incomes of households are calculated for all units, whether or not they had income.

[6] For more information, refer to the Census Dictionary: Household type

[7] Prior to the 2021 Census, this category refers to males. Starting in 2021, this category includes men (and/or boys), as well as some non-binary persons.

[8] Given that the non-binary population is small, data aggregation to a two-category gender variable is sometimes necessary to protect the confidentiality of responses provided. In these cases, individuals in the category "non-binary persons" are distributed into the other two gender categories and are denoted by the "+" symbol. The sex variable in census years prior to 2021 and the two-category gender variable in the 2021 Census are included together in this table. Although sex and gender refer to two different concepts, the introduction of gender is not expected to have a significant impact on data analysis and historical comparability, given the small size of the transgender and non-binary populations. For additional information on changes of concepts over time, please consult the Age, Sex at Birth and Gender Reference Guide.

[9] Prior to the 2021 Census, this category refers to females. Starting in 2021, this category includes women (and/or girls), as well as some non-binary persons.

[10] Given that the non-binary population is small, data aggregation to a two-category gender variable is sometimes necessary to protect the confidentiality of responses provided. In these cases, individuals in the category “non-binary persons” are distributed into the other two gender categories and are denoted by the “+” symbol. The sex variable in census years prior to 2021 and the two-category gender variable in the 2021 Census are included together in this table. Although sex and gender refer to two different concepts, the introduction of gender is not expected to have a significant impact on data analysis and historical comparability, given the small size of the transgender and non-binary populations. For additional information on changes of concepts over time, please consult the Age, Sex at Birth and Gender Reference Guide.

[11] One-census-family households with additional persons and multiple-census-family households.
