

Household income statistics by household type, Data Tables, 2021

Universe: Private households in occupied private dwellings, 2021 and 2016 censuses — 100% data

Household size (2) Household income statistics	Number of households (2021) (3, 4, 5)	Number of households (2016)	Nunavut		Median household total income (2020) (2020 constant dollars)	Median household total income (2015) (2020 constant dollars)	Median household after-tax income (2020) (2020 constant dollars)	Median household after-tax income (2015) (2020 constant dollars)
			Total - Households by household size					
Household type including census family structure								
Total – Household type including census family structure (6)	9,925	9,815	118,000	105,000	104,000	93,000		
Census-family households	7,570	7,500	129,000	111,000	116,000	99,000		
Households consisting of only one census family without additional persons	5,545	5,520	122,000	106,000	108,000	94,000		
One couple, with or without children in their census family	4,110	4,320	146,000	128,000	128,000	111,000		
Without children	915	960	184,000	182,000	154,000	151,000		
With children	3,195	3,360	136,000	115,000	122,000	101,000		
One one-parent census family	1,430	1,205	63,600	53,200	61,600	51,200		
With a parent that is a man+ (7, 8)	385	275	57,200	57,600	54,400	54,400		
With a parent that is a woman+ (9, 10)	1,045	930	65,500	52,400	64,000	50,000		
Other census family households (11)	2,025	1,975	145,000	118,000	135,000	109,000		
Non-census family households	2,355	2,320	86,000	89,000	73,000	76,000		

Abbreviation notes:

List of abbreviations and acronyms found within various Census products. (<https://www12.statcan.gc.ca/census-recensement/2021/ref/symb-ab-acr-eng.cfm>)

Geography name: Nunavut

Short-form total non-response rate: 20.2

Data quality flag: 02020

Data quality note: ..."

Footnotes:

[1] The boundaries and names of census geographies can change from one census to the next. In order to facilitate data comparisons between censuses, previous census data have been adjusted to reflect as closely as possible the 2021 boundaries of these areas. The methodology used for this adjustment involved spatially linking blocks of previous censuses (concordance to the 1996 Census used the 1996 enumeration areas to the 2021 boundaries). A previous census block was linked to the 2021 area within which its representative point fell. A limited number of interactive linkages were completed to further enhance the adjustment in certain areas. For some census geographies, it was not possible to reflect the 2021 boundaries. The 2021 boundaries may not be reflected as there was no previous census block to assign to the 2021 area. As well previous census data for some 2021 areas may not be available due to the fact that the concordance did not produce an accurate representation of the 2021 area.

[2] Household size

'Household size' refers to the number of persons in a private household.

[3] Total income refers to the sum of certain incomes (in cash and, in some circumstances, in kind) of the statistical unit during a specified reference period. The components used to calculate total income vary between: – Statistical units of social statistical programs such as persons, private households, census families and economic families, employers' contributions to registered pension plans, Canada Pension Plan, Québec Pension Plan and Employment Insurance, voluntary inter-household transfers, imputed rent, goods and services produced for barter and goods produced for own consumption."

[4] After-tax income refers to total income less income taxes of the statistical unit during a specified reference period. Income taxes refers to the sum of federal income taxes, provincial and territorial income taxes, less abatement where applicable. Provincial and territorial income taxes include health care premiums in certain jurisdictions. Abatement reduces the federal income taxes payable by persons residing in Quebec or in certain self-governing Yukon First Nation settlement lands.

[5] The median income of a specified group is the amount that divides the income distribution of that group into two halves, i.e., the incomes of half of the units in that group are below the median, while those of the other half are above the median. Median incomes of households are calculated for all units, whether or not they had income.

[6] For more information, refer to the Census Dictionary: Household type

[7] Prior to the 2021 Census, this category refers to males. Starting in 2021, this category includes men (and/or boys), as well as some non-binary persons.

[8] Given that the non-binary population is small, data aggregation to a two-category gender variable is sometimes necessary to protect the confidentiality of responses provided. In these cases, individuals in the category "non-binary persons" are distributed into the other two gender categories and are denoted by the "+" symbol. The sex variable in census years prior to 2021 and the two-category gender variable in the 2021 Census are included together in this table. Although sex and gender refer to two different concepts, the introduction of gender is not expected to have a significant impact on data analysis and historical comparability, given the small size of the transgender and non-binary populations. For additional information on changes of concepts over time, please consult the Age, Sex at Birth and Gender Reference Guide.

[9] Prior to the 2021 Census, this category refers to females. Starting in 2021, this category includes women (and/or girls), as well as some non-binary persons.

[10] Given that the non-binary population is small, data aggregation to a two-category gender variable is sometimes necessary to protect the confidentiality of responses provided. In these cases, individuals in the category “non-binary persons” are distributed into the other two gender categories and are denoted by the “+” symbol. The sex variable in census years prior to 2021 and the two-category gender variable in the 2021 Census are included together in this table. Although sex and gender refer to two different concepts, the introduction of gender is not expected to have a significant impact on data analysis and historical comparability, given the small size of the transgender and non-binary populations. For additional information on changes of concepts over time, please consult the Age, Sex at Birth and Gender Reference Guide.

[11] One-census-family households with additional persons and multiple-census-family households.
