Geography name: Nunavut

Geographic area type: Territory

Geographic area type abbreviation: TERR

Geographic level: Province or territory

Province or territory abbreviation: Nvt.

Dissemination Geography Unique Identifier (DGUID): 2021A000262

Alternative geographic code: 62

Province or territory geocode: 62

Short-form total non-response rate: 20.2

Data quality flag: 02020

Data quality note: ..."

Footnotes:

[1] Gender

Gender refers to an individual's personal and social identity as a man, woman or non-binary person (a person who is not exclusively a man or a woman). Gender includes the following concepts: gender identity, which refers to the gender that a person feels internally and individually

[2] Given that the non-binary population is small, data aggregation to a two-category gender variable is sometimes necessary to protect the confidentiality of responses provided. In these cases, individuals in the category "non-binary persons" are distributed into the other two gender categories and are denoted by the "+" symbol.

[3] Age

'Age' refers to the age of a person (or subject) of interest at last birthday (or relative to a specified, well-defined reference date).

[4] Total income refers to the sum of certain incomes (in cash and, in some circumstances, in kind) of the statistical unit during a specified reference period. The components used to calculate total income vary between:

– Statistical units of social statistical programs such as persons, private households, census families and economic families

[5] All income received as wages, salaries and commissions from paid employment and net self-employment income from farm or non-farm unincorporated business and/or professional practice during the reference period.
