Footnotes:
[1] Low-income status
Low-income status refers to the income situation of the statistical unit in relation to a specific low-income line in a reference year. Statistical units with income that is below the low-income line are considered to be in low income.  For the 2021 Census, the reference period for low-income data is the calendar year 2020.

[2] Household type
'Household type' refers to the differentiation of households on the basis of whether they are census family households or non-census-family households. Census family households are those that contain at least one census family. Non-census-family households are either one person living alone or a group of two or more persons who live together but do not constitute a census family. Census family households may be differentiated based on the presence of additional persons (that is, persons not in a census family).

[3] Low-income status refers to the income situation of the statistical unit in relation to a specific low-income line in a reference year. Statistical units with income that is below the low-income line are considered to be in low income. For the 2021 Census, the reference period for low income data is the calendar year 2020.

[4] Prevalence of low income - The proportion or percentage of units whose income falls below a specified low-income line.

[5] Low-income status refers to the income situation of the statistical unit in relation to a specific low-income line in a reference year. Statistical units with income that is below the low-income line are considered to be in low income. For the 2021 Census, the reference period for low income data is the calendar year 2020.

[6] Prevalence of low income - The proportion or percentage of units whose income falls below a specified low-income line.
