Table Corrections:
Date : 2022-09-07
Note : On September 7, 2022, this table was updated to correct an error that was identified in the Knowledge of languages " variable."
Geography name: Division No. 10
Geographic area type: Census division
Geographic area type abbreviation: CDR
Geographic level: Census division
Province or territory abbreviation: N.L.
Dissemination Geography Unique Identifier (DGUID): 2021A00031010
Alternative geographic code: 1010
Province or territory geocode: 10
Long-form total non-response rate: 7.3
Data quality flag: 00000
Data quality note: ..."
Footnotes:
[1] Age
'Age' refers to the age of a person (or subject) of interest at last birthday (or relative to a specified, well-defined reference date).
[2] Gender
Gender refers to an individual's personal and social identity as a man, woman or non-binary person (a person who is not exclusively a man or a woman).
Gender includes the following concepts: gender identity, which refers to the gender that a person feels internally and individually
[3] Given that the non-binary population is small, data aggregation to a two-category gender variable is sometimes necessary to protect the confidentiality of responses
provided. In these cases, individuals in the category "non-binary persons" are distributed into the other two gender categories and are denoted by the " + " symbol.
[4] Knowledge of official languages refers to whether the person can conduct a conversation in English only, French only, in both or in neither language. For a child who has not yet learned to speak, this includes languages that the child is learning to speak at home. Knowledge of non-official languages refers to whether the person can conduct a conversation in a language other than English or French. For a child who has not yet learned to speak, this includes languages that the child is learning at home. The number of languages that can be reported may vary between surveys, depending on the objective of the survey.
[5] Knowledge of official languages refers to whether the person can conduct a conversation in English only, French only, in both or in neither language. For a child who has not yet learned to speak, this includes languages that the child is learning to speak at home. Knowledge of non-official languages refers to whether the person can conduct a conversation in a language other than English or French. For a child who has not yet learned to speak, this includes languages that the child is learning to speak at home. The number of languages that can be reported may vary between surveys, depending on the objectives of the survey.
[6] The total single and multiple language responses indicates the number of respondents who reported each language, either as their only response, or in combination with another language. Total responses represent the sum of single language responses and multiple language responses received in the census.
[7] For more information on language variables, including information on their classifications, the questions from which they are derived, data quality and their comparability with other sources of data, please refer to the Languages Reference Guide, Census of Population, 2021
[8] A single language response occurs when a respondent provides one language only.
[9] A multiple language response occurs when a respondent provides two or more languages.
[10] n.i.e. $=$ not included elsewhere n.o.s. $=$ not otherwise specified
[11] For more information on language variables, including information on their classifications, the questions from which they are derived, data quality and their comparability with other sources of data, please refer to the Languages Reference Guide, Census of Population, 2021.
[12] Users should be aware that estimates associated with Indigenous languages are more affected than most by the incomplete enumeration of certain reserves and settlements in the Census of Population.
