## Housing, Census Profile, 2021

			Division No. 11, Census division (CDR) [Census division], Newfoundland and Labrador							
			Counts			Rates				
Topic	Characteristic	Note	Total	Men+	Women+	Total	Men+	Women+		
Household	Total - Private households by tenure - 25% sample data	50	780			100.0				
characteristics	Owner		630			80.8				
	Renter		150			19.2				
	Dwelling provided by the local government, First Nation or Indian band		0			0.0				
	Total - Occupied private dwellings by condominium status - 25% sample data	51	780			100.0				
	Condominium		0			0.0				
	Not condominium		780			100.0				
	Total - Occupied private dwellings by number of bedrooms - 25% sample data	52	780			100.0				
	No bedrooms		0			0.0				
	1 bedroom		30			3.8				
	2 bedrooms		185			23.7				
	3 bedrooms		405			51.9				
	4 or more bedrooms		155			19.9				
	Total - Occupied private dwellings by number of rooms - 25% sample data	53	780			100.0				
	1 to 4 rooms		210			26.9				
	5 rooms		270			34.6				
	6 rooms		155			19.9				
	7 rooms		85			10.9				
	8 or more rooms		65			8.3				
	Average number of rooms per dwelling		5.4			5.4				
	Total - Private households by number of persons per room - 25% sample data	54	780			100.0				
	One person or fewer per room		745			95.5				
	More than one person per room		35			4.5				
	Total - Private households by housing suitability - 25% sample data	55	780			100.0				
	Suitable		705			90.4				
	Not suitable		75			9.6				
	Total - Occupied private dwellings by period of construction - 25% sample data	56	780			100.0				
	1960 or before		15			1.9				
	1961 to 1980		125			16.0				
	1981 to 1990		110			14.1				
	1991 to 2000		205			26.3				
	2001 to 2005		90			11.5				
	2006 to 2010		80			10.3				
	2011 to 2015		70			9.0				
	2016 to 2021	57	70			9.0				
	Total - Occupied private dwellings by dwelling condition - 25% sample data	58	780			100.0				
	Only regular maintenance and minor repairs needed		570			73.1				
	Major repairs needed		215			27.6				
	Total - Private households by number of household maintainers - 25% sample data	59	780			100.0				
	One-maintainer household		385			49.4				
	Two-maintainer household		335			42.9				
	Three-or-more-maintainer household		60			7.7				
	Total - Private households by age of primary household maintainers - 25% sample data	60	780			100.0				
	15 to 24 years	00	20			2.6				
			20			2.0

... : not applicable

Notes:

[50] Tenure refers to whether the household owns or rents their private dwelling. The private dwelling may be situated on rented or leased land or be part of a condominium. A household is considered to own their dwelling if some member of the household owns the dwelling even if it is not fully paid for for example if there is a mortgage or some other claim on it. A household is considered to rent their dwelling if no member of the household owns the dwelling. A household is considered to rent that dwelling even if the dwelling is provided without cash rent or at a reduced rent or if the dwelling is part of a cooperative.

For historical and statutory reasons shelter occupancy on Indian reserves or settlements does not lend itself to the usual classification by standard tenure categories. Therefore a special category 'dwelling provided by the local government First Nation or Indian band 'has been created for census purposes.

[51] Condominium status refers to whether the private dwelling is part of a condominium development. A condominium is a residential complex in which dwellings are owned individually while land and common elements are held in joint ownership with others.

[52] Bedrooms refers to rooms in a private dwelling that are designed mainly for sleeping purposes even if they are now used for other purposes such as guest rooms and television rooms. Also included are rooms used as bedrooms now even if they were not originally built as bedrooms such as bedrooms in a finished basement. Bedrooms exclude rooms designed for another use during the day such as dining rooms and living rooms even if they may be used for sleeping purposes at night. By definition one-room private dwellings such as bachelor or studio apartments have zero bedrooms.

[53] Rooms refers to enclosed areas within a private dwelling which are finished and suitable for year round living. The number of rooms in a private dwelling includes kitchens bedrooms and finished rooms in the attic or basement. The number of rooms in a private dwelling excludes bathrooms halls vestibules and rooms used solely for business purposes. Partially divided rooms are considered to be separate rooms if they are considered as such by the respondent (e.g. L-shaped dining-room and living-room arrangements).

[54] Number of persons per room - Refers to an indicator of the level of crowding in a private dwelling. It is calculated by dividing the number of persons in the household by the number of rooms in the dwelling.

[55] Housing suitability refers to whether a private household is living in suitable accommodations according to the National Occupancy Standard (NOS)

'Housing suitability' assesses the required number of bedrooms for a household based on the age sex and relationships among household members. An alternative variable 'persons per room ' considers all rooms in a private dwelling and the number of household members.

Housing suitability and the National Occupancy Standard (NOS) on which it is based were developed by Canada Mortgage and Housing Corporation (CMHC) through consultations with provincial housing agencies.

[56] Period of construction refers to the period in time during which the building or dwelling was originally constructed.

This refers to the period in which the building was completed not the time of any later remodeling additions or conversions.

For properties having multiple residential structures this refers to the period in which the most recent structure was completed.

[57] Includes data up to May 11 2021.

[58] Dwelling condition refers to whether the dwelling is in need of repairs. This does not include desirable remodelling or additions.

[59] Refers to whether or not a person residing in the household is responsible for paying the rent or the mortgage or the taxes or the electricity or other services or utilities. Where a number of people may contribute to the payments more than one person in the household may be identified as a household maintainer. If no person in the household is identified as making such payments the reference person is identified by default.

[60] Primary household maintainer - The first person in the household identified as someone who pays the rent or the mortgage or the taxes or the electricity or other services or utilities for the dwelling. When more than one member of the household contributes to the payments the first person listed is chosen as the primary household maintainer. If no person in the household is identified as making any such payments the first person listed is selected by default.

The order of the persons in a household is determined by the order in which they are listed on the questionnaire. Generally an adult is listed first followed if applicable by their spouse or common-law partner and then by their children. The order does not necessarily correspond to the proportion of household payments made by each person.

[61] Shelter-cost-to-income ratio - Refers to the proportion of average total income of household which is spent on shelter costs.

Shelter-cost-to-income ratio is calculated for private households who reported a total household income greater than zero.

Private households located on an agricultural operation that is operated by a member of the household and households who reported a zero or negative total household income are excluded.

The relatively high shelter-costs-to-household income ratios for some households may have resulted from the difference in the reference period for shelter costs and household total income data. The reference period for shelter cost data is 2021 while household total income is reported for the year 2020. As well for some households the 2020 household total income may represent income for only part of a year.

For more information on household total income or shelter costs refer to the Census Dictionary: Total income and Shelter cost.

[62] Acceptable housing refers to whether a household meets each of the three indicator thresholds established by the Canada Mortgage and Housing Corporation for housing adequacy suitability and affordability. Housing indicator thresholds are defined as follows:

\*Adequate housing is reported by their residents as not requiring any major repairs.

\*Affordable housing has shelter costs equal to less than 30% of total before-tax household income.

\*Suitable housing has enough bedrooms for the size and composition of resident households according to the National Occupancy Standard (NOS) conceived by the Canada Mortgage and Housing Corporation and provincial and territorial representatives.

Acceptable housing identifies which thresholds the household falls below if any. Housing that is adequate in condition suitable in size and affordable is considered to be acceptable.

Households below and above the thresholds are based on the indicators for which individual households can be assessed. Farm and on-reserve households whose housing does not meet either or both of the suitability and adequacy thresholds are counted in the total of households below the thresholds. Farm and on-reserve households who live in housing that meets both the suitability and adequacy thresholds are counted in the total of households. Farm and on-reserve households and on-reserve households cannot be assessed for housing affordability because the concept is not applicable.

Housing affordability is assessed for owner and tenant households with household total income greater than zero in non-farm non-reserve private dwellings.

[63] Core housing need refers to whether a private household's housing falls below at least one of the indicator thresholds for housing adequacy affordability or suitability and would have to spend 30% or more of its total beforetax income to pay the median rent of alternative local housing that is acceptable (attains all three housing indicator thresholds). Housing indicator thresholds are defined as follows: Adequate housing is reported by their residents as not requiring any major repairs. Affordable housing has shelter costs equal to less than 30% of total before-tax household income. Suitable housing has enough bedrooms for the size and composition of resident households according to the National Occupancy Standard (NOS) conceived by the Canada Mortgage and Housing Corporation and provincial and territorial representatives. Only private non-farm non-reserve and owner- or renterhouseholds with incomes greater than zero and shelter-cost-to-income ratios less than 100% are assessed for 'core housing need.' Non-family households with at least one maintainer aged 15 to 29 attending school are considered not to be in 'core housing need' regardless of their housing circumstances. Attending school is considered a transitional phase and low incomes earned by student households are viewed as being a temporary condition.

[64] Presence of mortgage payments refers to whether an owner household makes regular mortgage or loan payments for their dwelling.

[65] Shelter cost refers to the average monthly total of all shelter expenses paid by households.

Shelter costs for owner households include where applicable mortgage payments property taxes and condominium fees along with the costs of electricity heat water and other municipal services. For renter households shelter costs include where applicable the rent and the costs of electricity heat water and other municipal services. For households living in a dwelling provided by the local government First Nation or Indian band shelter costs include where applicable the monthly use or occupancy payment and the costs of electricity heat water and other municipal services.

[66] Value (owner estimated) refers to the dollar amount expected by the owner if the asset were to be sold.

In the context of dwelling it refers to the value of the entire dwelling including the value of the land it is on and of any other structure such as a garage which is on the property. If the dwelling is located in a building which contains several dwellings or a combination of residential and business premises all of which the household owns the value is estimated as a portion of the market value that applies only to the dwelling in which the household resides.

[67] Subsidized housing refers to whether a renter household lives in a dwelling that is subsidized. Subsidized housing includes rent geared to income social housing public housing government-assisted housing non-profit housing rent supplements and housing allowances.
