| 2021 | 50,5                               | 31,5                              | 26,7   |  | 37,6  | 15,2  | 47,1   |

Region according to the regional classification of the latest statistical year.

Statistical unit: person (dwelling population).

Income concept: several.

Consumption unit scale: Eurostat's equivalence scale (1.0 - 0.5 - 0.3).

Due to revisions to income concepts the figures for 1995 to 2009 and 2010 onwards are not fully comparable with each other.

Latest update: 20221219 08:00
