	Couple with 2 children	92,7	94,4	86,8	..	95,9	87,3	79,6	..
	Couple without children	92,5	94,3	86,6	..	91,3	84,7	78,9	..

As a basis, the calculations use AW, the average wage in the private sector as defined by OECD. The compensation rate is the income compared to previous income from work, when previous income was the referenced percentage of AW.

Income is equalised, that is the increase of the household when a child is born is taken into consideration.

Income: Income in percent of average wage in the private sector. First value is income level for singles. Second values are income levels for a couple
