Description

Mortality rate by educational attainment. Number of deaths and deaths per 100 000 persons per year. Five-year moving averages, i.e. averages for overlapping five-year periods.

The statistics include all persons registered as a resident of Norway at the time of death, regardless of whether the death occurred in Norway or abroad. Rates are age and gender standardised to reduce the effect of differing distributions when groups are compared over time and between geographical regions. Yearly figures are adjusted according to 5-year age groups in the Norwegian population per 1 January 2012.

To change the table, open the "change selection of...".

Three measures are available. Use the Measure button to select:

1. Number = Number of deaths per year, set as five-year moving averages (Only shown for Norway, for privacy reasons)

- 2. Deaths per 100 000 persons per year, standardized = Number of deaths per 100 000 inhabitants* per year (rate). Standardized for age and gender composition
- 3. Standardized ratio (Norway = 100) = Ratio between the county's standardized rate and the national rate for a given year. Examples; ratio = 130 means that the county's standardized rate is 30% higher than the national level. A ratio of 87 means that the county's rate is 13% lower than the national level.

Four levels of education are available. Use the Education menu to select:

- All educational levels
- Compulsory education = all who have completed primary and lower secondary school.
- Upper secondary school = all who have completed this.
- Tertiary education = all who have completed an education beyond upper secondary school.

Comment on publication August 2019:

For the years 2014 to 2016, the figures may differ slightly from what has been published previously. This is due to errors in previously delivered data from the data provider.

Source

Statistics Norway

Collection

Based on a data linkage between the Norwegian Tax Administration's National Population Register and Statistics Norway's National Education Database. Deaths are reported to the population registry in the deceased person's municipality of residence. Reports of deaths abroad of Norwegian residents are received via the Ministry of Foreign Affairs or the Norwegian Maritime Directorate. Educational attainment of the population is updated each year according to newly completed education levels during the previous 12 months. Education completed abroad is sent to Statistics Norway by the State Educational Loan Fund.

Data quality

The quality of death notices is generally very good and there is little delay in reporting. Some people emigrate without notifying the population register, but this has no significant effect on mortality calculations. Data quality in the National Education Database is very good because individual educational institutions in Norway have a duty to provide data to Statistics Norway. The weakest point is education completed abroad and educational attainment of people who have immigrated to Norway after they have finished their education. Immigrants with unclassified education level are not included in these statistics.

Statistical analysis

People with no information about their educational attainment are not included. These people are primarily immigrants who completed their education before coming to Norway.

When numbers are missing

Statistics based on fewer than 3 cases is hidden to protect the identity of the persons. Figures are also hidden when the population group in which the cases originate, is smaller than 10 persons. If more than 20 per cent of the cases in a time series are hidden due to the abovementioned reasons, the complete time series is hidden to avoid giving a skewed impression.

Some values are hidden to prevent their use in calculating a value hidden for privacy reasons.

The entire time series is removed if over half the rates are based on 6 or fewer deaths. This is because of reduced reliability.

Time periods

1990-1994 - 2014-2018 (5-year moving averages)

Geographical level

Country, health region, counties

Gender

Both genders, men, women

Age groups

30+ years, 30-74 years and 75 years and over.
