CellMark Legend

- .. Missing data
- . Not possible to calculate
- : Hidden value

Description

Highest completed level of education in the Norwegian population aged 25 years and over.

Three measures are available:

1. number of people
2. per cent (within the same age group and gender)
3. ratio (Norway = 100): Ratio between the county's rate and the national rate for a given year. Examples; ratio = 130 means that the county's rate is 30% higher than the national level. A ratio of 87 means that the county's rate is 13% lower than the national level.

Classification of Highest level of education:

- Compulsory education (primary and lower secondary school)
- Upper secondary school
- Tertiary education

Changes in the figures can be due to revisions in the source register, and to correction of previous errors in the data delivered from the source register.

Comments to data published jan-2023:

The handling of small numbers is revised. This can lead to other data cells being hidden than in previously published data. Previously in Norhealth, age standardised figures were available. These are removed, but there are now data for more age groups.

Rationale for indicator

There are well documented correlations between educational attainment, material standard of living and health.

Notes

As of January 2023 the same dataset is published in Norhealth as in the KommuneHelse statistics bank. Due to this, Norhealth now has data for municipalities and city districts added, while data for health regions have been removed.

Source

Statistics Norway

Collection

Educational attainment of the population is updated each year according to newly completed education levels during the previous 12 months. All data is stored within Statistics Norway's National Education Database. Education completed abroad is sent to Statistics Norway by the State Educational Loan Fund.

Data quality

The data quality is very good. Individual educational institutions in Norway have a duty to provide data to Statistics Norway. All data goes through a considerable control and checking process to eliminate as many errors as possible. Some pupils or students may be left out if Statistics Norway does not receive data from a known institution, or if they are unaware of a newly established educational institution. The weakest point of these figures is education completed abroad and the educational attainment of people who have immigrated to Norway after they have finished their education. People with unknown or no completed education are not included in the figures. The majority are immigrants with missing information about their education level.

When numbers are missing

Statistics based on fewer than 3 cases is hidden to protect the identity of the persons. Figures are also hidden when the population group in which the cases originate, is smaller than 10 persons.

If more than 20 per cent of the cases in a time series are hidden due to the abovementioned reasons, the complete time series is hidden to avoid giving a skewed impression.

The complete time series is also hidden if more than 50 per cent of the values in the series are based on 6 or fewer cases. In this case, the figures are regarded as too uncertain.

For technical reasons, the number of years in the data is limited to 30. The first year is deleted when a new year is added.

Time periods

1989-2022

Geographical level

Country, counties, municipalities. City districts in Oslo, Bergen, Stavanger and Trondheim.

Gender

Both genders, men, women

Age groups

All adults (25+ years), 25-44, 25-29, 30-39, 40-44, 45-74, 75 years and over.

Frequency of updates

Annually
