B17001C: POVERTY STATUS IN THE PAST 12 MONTHS BY SEX BY AGE (AMERICAN INDIAN AND ALASKA NATIVE ALONE)
Universe: American Indian and Alaska Native alone population for whom poverty status is determined
2021 American Community Survey, 1-Year Estimates Detailed Tables

	Alaska	
	Estimate	Margin of Error
Total:	97,879	±4,329
Income in the past 12 months below poverty level:	21,461	±2,284
Male:	10,768	±1,596
Under 5 years	1,142	±334
5 years	125	±105
6 to 11 years	985	±277
12 to 14 years	535	±175
15 years	200	±142
16 and 17 years	354	±175
18 to 24 years	1,357	±502
25 to 34 years	1,769	±594
35 to 44 years	1,172	±302
45 to 54 years	747	±309
55 to 64 years	1,424	±416
65 to 74 years	844	±696
75 years and over	114	±69
Female:	10,693	±1,232
Under 5 years	1,103	±356
5 years	196	±133
6 to 11 years	1,025	±387
12 to 14 years	524	±252
15 years	104	±82
16 and 17 years	221	±146
18 to 24 years	1,236	±513
25 to 34 years	1,658	±440
35 to 44 years	1,440	±469
45 to 54 years	1,216	±543
55 to 64 years	1,025	±265
65 to 74 years	641	±326
75 years and over	304	±176
Income in the past 12 months at or above poverty level:	76,418	±4,274
Male:	38,243	±2,965
Under 5 years	2,933	±489
5 years	547	±196
6 to 11 years	4,598	±1,045
12 to 14 years	2,449	±516
15 years	834	±323
16 and 17 years	1,564	±538
18 to 24 years	3,683	±705
25 to 34 years	6,421	±665
35 to 44 years	4,497	±782
45 to 54 years	3,239	±956
55 to 64 years	3,656	±609
65 to 74 years	2,992	±773
75 years and over	830	±323
Female:	38,175	±2,463
Under 5 years	3,072	±696
5 years	462	±194
6 to 11 years	4,466	±672
12 to 14 years	2,266	±653
15 years	314	±162
16 and 17 years	1,048	±262
18 to 24 years	3,685	±591
25 to 34 years	5,563	±994
35 to 44 years	4,260	±713

45 to 54 years	3,710	±778
55 to 64 years	4,607	±763
65 to 74 years	2,925	±551
75 years and over	1,797	±667

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section. Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Source: U.S. Census Bureau, 2021 American Community Survey 1-Year Estimates

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.

The Hispanic origin and race codes were updated in 2020. For more information on the Hispanic origin and race code changes, please visit the American Community Survey Technical Documentation website.

The 2021 American Community Survey (ACS) data generally reflect the March 2020 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas. In certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineations due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

- : The estimate could not be computed because there were an insufficient number of sample observations. For a ratio of medians estimate, one or both of the median estimates falls in the lowest interval or highest interval of an open-ended distribution. For a 5-year median estimate, the margin of error associated with a median was larger than the median itself.

N : The estimate or margin of error cannot be displayed because there were an insufficient number of sample cases in the selected geographic area.

(X) : The estimate or margin of error is not applicable or not available.

median- : The median falls in the lowest interval of an open-ended distribution (for example "2,500-")

median+ : The median falls in the highest interval of an open-ended distribution (for example "250,000+").

** : The margin of error could not be computed because there were an insufficient number of sample observations.

*** : The margin of error could not be computed because the median falls in the lowest interval or highest interval of an open-ended distribution.

***** : A margin of error is not appropriate because the corresponding estimate is controlled to an independent population or housing estimate. Effectively, the corresponding estimate has no sampling error and the margin of error may be treated as zero.
