Native Hawaiian and Other Pacific Islander	11,171	±1,369	1.5%	±0.2
Native Hawaiian	1,086	$\pm 804$	0.1%	±0.1
Chamorro	151	±208	0.0%	±0.1
Samoan	8,170	±1,451	1.1%	±0.2
Other Pacific Islander	1,764	±1,164	0.2%	±0.2
Some other race	19,118	±3,239	2.6%	±0.4
Two or more races	97,633	$\pm 6,708$	13.3%	±0.9
White and Black or African American	7,013	$\pm 2,130$	1.0%	±0.3
White and American Indian and Alaska Native	40,190	±4,243	5.5%	±0.6
White and Asian	10,808	±2,467	1.5%	±0.3
Black or African American and American Indian and Alaska Native	1,091	±557	0.1%	±0.1
Race alone or in combination with one or more other races				
Total population	732,673	*****	732,673	(X)
White	522,115	±5,993	71.3%	±0.8
Black or African American	38,623	±2,234	5.3%	±0.3
American Indian and Alaska Native	151,861	±2,611	20.7%	±0.4
Asian	65,864	±1,877	9.0%	±0.3
Native Hawaiian and Other Pacific Islander	18,313	±2,587	2.5%	±0.4
Some other race	43,669	±3,707	6.0%	±0.5
HISPANIC OR LATINO AND RACE				
Total population	732,673	****	732,673	(X)
Hispanic or Latino (of any race)	52,291	±569	7.1%	±0.1
Mexican	22,299	$\pm 2,408$	3.0%	±0.3
Puerto Rican	8,653	±2,571	1.2%	±0.4
Cuban	3,182	±1,505	0.4%	±0.2
Other Hispanic or Latino	18,157	±2,652	2.5%	±0.4
Not Hispanic or Latino	680,382	±569	92.9%	±0.1
White alone	424,145	±2,256	57.9%	±0.3
Black or African American alone	21,085	±2,254	2.9%	±0.3
American Indian and Alaska Native alone	98,626	±4,453	13.5%	±0.6
Asian alone	46,611	±2,607	6.4%	±0.4
Native Hawaiian and Other Pacific Islander alone	10,994	±1,352	1.5%	±0.2
Some other race alone	3,744	±1,294	0.5%	±0.2
Two or more races	75,177	±6,102	10.3%	±0.8
Two races including Some other race	8,278	±2,048	1.1%	±0.3
Two races excluding Some other race, and Three or more races	66,899	±5,751	9.1%	±0.8
Total housing units	327,889	±219	(X)	(X)
CITIZEN, VOTING AGE POPULATION				
Citizen, 18 and over population	533,852	±2,824	533,852	(X)
Male	281,367	±2,019	52.7%	±0.3
Female	252,485	±2,132	47.3%	±0.3

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section. Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.

For more information on understanding Hispanic origin and race data, please see the America Counts: Stories Behind the Numbers article entitled, 2020 Census Illuminates Racial and Ethnic Composition of the Country, issued August 2021.

The Hispanic origin and race codes were updated in 2020. For more information on the Hispanic origin and race code changes, please visit the American Community Survey Technical Documentation website.

The 2021 American Community Survey (ACS) data generally reflect the March 2020 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas. In certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineations due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

## Explanation of Symbols:

- : The estimate could not be computed because there were an insufficient number of sample observations. For a ratio of medians estimate, one or both of the median estimates falls in the lowest interval or highest interval of an open-ended distribution. For a 5-year median estimate, the margin of error associated with a median was larger than the median itself.

N: The estimate or margin of error cannot be displayed because there were an insufficient number of sample cases in the selected geographic area. (X): The estimate or margin of error is not applicable or not available.

median- : The median falls in the lowest interval of an open-ended distribution (for example "2,500-")

median+: The median falls in the highest interval of an open-ended distribution (for example "250,000+").

\*\*: The margin of error could not be computed because there were an insufficient number of sample observations.

\*\*\* : The margin of error could not be computed because the median falls in the lowest interval or highest interval of an open-ended distribution.

\*\*\*\*\* : A margin of error is not appropriate because the corresponding estimate is controlled to an independent population or housing estimate. Effectively, the corresponding estimate has no sampling error and the margin of error may be treated as zero.
