MEDIAN FAMILY INCOME IN THE PAST 12 MONTHS (IN 2021 INFLATION-ADJUSTED DOLLARS) FOR FAMILIES WITH OWN CHILDREN								
Special Subject								
Median income (dollars)	94,023	±5,564	115,261	±7,127	73,505	±18,048	43,276	±4,172

Children under 18 years in households	179,004	±708	124,998	±4,878	13,847	±2,197	38,623	±4,447
PUBLIC ASSISTANCE IN THE PAST 12 MONTHS								
Children living in households with Supplemental Security Income (SSI), cash public assistance income, or Food Stamp/SNAP benefits	26.3%	±2.2	18.2%	±2.5	36.0%	±8.8	50.0%	±7.1
POVERTY STATUS IN THE PAST 12 MONTHS								
Children in households for whom poverty status is determined	176,561	±1,211	124,217	±4,862	13,785	±2,175	38,303	±4,392
Income in the past 12 months below poverty level	12.4%	±2.3	6.0%	±1.8	16.1%	±6.7	31.0%	±7.7
Income in the past 12 months at or above poverty level	87.6%	±2.3	94.0%	±1.8	83.9%	±6.7	69.0%	±7.7
HOUSING TENURE								
Children under 18 years in occupied housing units	179,004	±708	124,998	±4,878	13,847	±2,197	38,623	±4,447
In owner-occupied housing units	70.2%	±2.8	77.0%	±3.3	54.3%	±8.6	53.8%	±6.4
In renter-occupied housing units	29.8%	±2.8	23.0%	±3.3	45.7%	±8.6	46.2%	±6.4

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section. Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.

Foreign born excludes people born outside the United States to a parent who is a U.S. citizen.

Excludes householders, spouses, and unmarried partners.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

Public assistance includes receipt of Supplemental Security Income (SSI), cash public assistance income, or Food Stamps.

The 2021 American Community Survey (ACS) data generally reflect the March 2020 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas. In certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineations due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:
- : The estimate could not be computed because there were an insufficient number of sample observations. For a ratio of medians estimate, one or both of the median estimates falls in the lowest interval or highest interval of an open-ended distribution. For a 5-year median estimate, the margin of error associated with a median was larger than the median itself.
N : The estimate or margin of error cannot be displayed because there were an insufficient number of sample cases in the selected geographic area.
(X) : The estimate or margin of error is not applicable or not available.
median- : The median falls in the lowest interval of an open-ended distribution (for example "2,500-")
median+ : The median falls in the highest interval of an open-ended distribution (for example "250,000+").
** : The margin of error could not be computed because there were an insufficient number of sample observations.
*** : The margin of error could not be computed because the median falls in the lowest interval or highest interval of an open-ended distribution.
***** : A margin of error is not appropriate because the corresponding estimate is controlled to an independent population or housing estimate. Effectively, the corresponding estimate has no sampling error and the margin of error may be treated as zero.
