

**B02014: AMERICAN INDIAN AND ALASKA NATIVE ALONE FOR SELECTED TRIBAL GROUPINGS**

Universe: People who are American Indian and Alaska Native alone and people with no tribe reported

2022 American Community Survey, 5-Year Estimates Detailed Tables

	Alaska	Margin of Error
	Estimate	
Total:	104,957	±1,788
American Indian tribes, specified:	4,703	±664
Apache	132	±95
Arapaho	104	±166
Blackfeet	87	±50
Canadian and French American Indian	175	±100
Central American Indian	69	±64
Cherokee	786	±234
Cheyenne	53	±43
Chickasaw	53	±67
Chippewa	388	±160
Choctaw	296	±195
Colville	12	±16
Comanche	28	±37
Cree	19	±30
Creek	17	±20
Crow	40	±34
Delaware	6	±8
Hopi	3	±4
Houma	59	±84
Iroquois	50	±46
Kiowa	0	±24
Lumbee	68	±67
Menominee	21	±28
Mexican American Indian	174	±139
Navajo	177	±125
Osage	5	±7
Ottawa	11	±13
Paiute	24	±17
Pima	0	±24
Potawatomi	108	±114
Pueblo	85	±75
Puget Sound Salish	33	±59
Seminole	17	±20
Shoshone	68	±84
Sioux	314	±161
South American Indian	81	±67
Spanish American Indian	0	±24
Tohono O'Odham	75	±127
Ute	69	±88
Yakama	89	±95
Yaqui	42	±42
Yuman	36	±39
All other American Indian tribes (with only one tribe reported)	829	±343
American Indian tribes, not specified	476	±164
Alaska Native tribes, specified:	85,504	±1,588
Alaskan Athabascan	11,737	±892
Aleut	7,815	±768
Inupiat	23,237	±1,208
Tlingit-Haida	7,060	±524
Tsimshian	1,357	±170
Yup'ik	34,298	±1,261
Alaska Native tribes, not specified	11,602	±1,256
American Indian or Alaska Native tribes, not specified	10	±11
Two or More American Indian or Alaska Native Tribes	2,662	±476

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, the decennial census is the official source of population totals for April 1st of each decennial year. In between censuses, the Census Bureau's Population Estimates Program produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.

Information about the American Community Survey (ACS) can be found on the ACS website. Supporting documentation including code lists, subject definitions, data accuracy, and statistical testing, and a full list of ACS tables and table shells (without estimates) can be found on the Technical Documentation section of the ACS website. Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Source: U.S. Census Bureau, 2018-2022 American Community Survey 5-Year Estimates

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.

"Total includes people who reported American Indian or Alaska Native only, regardless of whether they reported one or more American Indian or Alaska Native tribes or tribal groupings.

All Other American Indian Tribes (with only one tribe reported). Includes respondents who provide a response of another American Indian tribe not shown separately, such as Abenaki, Catawba, Eastern Tribes, Kickapoo, Mattaponi, Quapaw, Shawnee, or Yuchi.

American Indian Tribes, not specified. Includes people who provide a generic term such as ""American Indian"" or tribal groupings not elsewhere classified.

Alaska Native Tribes, not specified. Includes people who provide a generic term such as ""Alaska Indian"" or ""Alaska Native"" or tribal groupings not elsewhere classified.

American Indian Tribes or Alaska Native Tribes, not specified. Includes respondents who checked the American Indian or Alaska Native response category on the ACS questionnaire and did not write in a specific group.

Two or more American Indian or Alaska Native Tribes. Includes respondents who provided multiple American Indian or Alaska Native Tribes responses such as Blackfeet and Pueblo; or Alaskan Athabascan and Tlingit-Haida; or Paiute and Aleut."

The Hispanic origin and race codes were updated in 2020. For more information on the Hispanic origin and race code changes, please visit the American Community Survey Technical Documentation website.

The 2018-2022 American Community Survey (ACS) data generally reflect the March 2020 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas. In certain instances, the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineation lists due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on 2020 Census data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

- The estimate could not be computed because there were an insufficient number of sample observations. For a ratio of medians estimate, one or both of the median estimates falls in the lowest interval or highest interval of an open-ended distribution. For a 5-year median estimate, the margin of error associated with a median was larger than the median itself.

N The estimate or margin of error cannot be displayed because there were an insufficient number of sample cases in the selected geographic area.

(X) The estimate or margin of error is not applicable or not available.

median- The median falls in the lowest interval of an open-ended distribution (for example "2,500-")

median+ The median falls in the highest interval of an open-ended distribution (for example "250,000+").

\*\* The margin of error could not be computed because there were an insufficient number of sample observations.

\*\*\* The margin of error could not be computed because the median falls in the lowest interval or highest interval of an open-ended distribution.

\*\*\*\*\* A margin of error is not appropriate because the corresponding estimate is controlled to an independent population or housing estimate. Effectively, the corresponding estimate has no sampling error and the margin of error may be treated as zero.
