

B24032: SEX BY INDUSTRY AND MEDIAN EARNINGS IN THE PAST 12 MONTHS (IN 2022 INFLATION-ADJUSTED DOLLARS) FOR THE CIVILIAN EMPLOYED POPULATION 16 YEARS AND OVER

**Universe: Civilian employed population 16 years and over with earnings
2022 American Community Survey, 1-Year Estimates Detailed Tables**

	Alaska	
	Estimate	Margin of Error
Male:	58,412	±3,330
Agriculture, forestry, fishing and hunting, and mining:	95,842	±13,830
Agriculture, forestry, fishing and hunting	46,899	±13,546
Mining, quarrying, and oil and gas extraction	118,085	±33,903
Construction	62,891	±5,814
Manufacturing	40,411	±8,877
Wholesale trade	75,987	±41,758
Retail trade	36,099	±3,072
Transportation and warehousing, and utilities:	64,918	±9,627
Transportation and warehousing	63,502	±11,741
Utilities	91,250	±22,277
Information	72,646	±7,626
Finance and insurance, and real estate, and rental and leasing:	68,432	±15,920
Finance and insurance	81,157	±31,325
Real estate and rental and leasing	50,257	±15,679
Professional, scientific, and management, and administrative, and waste management services:	72,606	±11,364
Professional, scientific, and technical services	105,557	±7,501
Management of companies and enterprises	128,644	±95,486
Administrative and support and waste management services	43,318	±9,992
Educational services, and health care and social assistance:	57,718	±5,290
Educational services	52,535	±7,349
Health care and social assistance	60,770	±5,274
Arts, entertainment, and recreation, and accommodation and food services:	29,297	±8,617
Arts, entertainment, and recreation	35,870	±19,276
Accommodation and food services	22,169	±8,244
Other services, except public administration	60,400	±16,259
Public administration	76,916	±2,708
Female:	44,607	±1,919
Agriculture, forestry, fishing and hunting, and mining:	51,299	±30,609
Agriculture, forestry, fishing and hunting	17,724	±13,660
Mining, quarrying, and oil and gas extraction	99,714	±65,195
Construction	50,986	±4,497
Manufacturing	31,377	±17,245
Wholesale trade	35,589	±14,569
Retail trade	25,451	±3,630
Transportation and warehousing, and utilities:	37,593	±10,912
Transportation and warehousing	34,674	±8,465
Utilities	58,177	±19,869
Information	34,011	±13,235
Finance and insurance, and real estate, and rental and leasing:	48,900	±8,769
Finance and insurance	63,836	±3,185
Real estate and rental and leasing	32,356	±15,999
Professional, scientific, and management, and administrative, and waste management services:	50,748	±9,415
Professional, scientific, and technical services	60,818	±6,781
Management of companies and enterprises	77,537	±96,293
Administrative and support and waste management services	39,730	±9,711
Educational services, and health care and social assistance:	51,361	±2,833
Educational services	51,243	±3,770
Health care and social assistance	51,463	±4,193
Arts, entertainment, and recreation, and accommodation and food services:	24,452	±3,329
Arts, entertainment, and recreation	19,627	±11,755
Accommodation and food services	25,021	±2,932
Other services, except public administration	34,938	±11,044
Public administration	61,341	±3,290

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, the decennial census is the official source of population totals for April 1st of each decennial year. In between censuses, the Census Bureau's Population Estimates Program produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.

Information about the American Community Survey (ACS) can be found on the ACS website. Supporting documentation including code lists, subject definitions, data accuracy, and statistical testing, and a full list of ACS tables and table shells (without estimates) can be found on the Technical Documentation section of the ACS website. Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Source: U.S. Census Bureau, 2022 American Community Survey 1-Year Estimates

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.

Industry titles and their 4-digit codes are based on the 2017 North American Industry Classification System. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

The 2022 American Community Survey (ACS) data generally reflect the March 2020 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas. In certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineations due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on 2020 Census data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

- The estimate could not be computed because there were an insufficient number of sample observations. For a ratio of medians estimate, one or both of the median estimates falls in the lowest interval or highest interval of an open-ended distribution. For a 5-year median estimate, the margin of error associated with a median was larger than the median itself.

N The estimate or margin of error cannot be displayed because there were an insufficient number of sample cases in the selected geographic area.

(X) The estimate or margin of error is not applicable or not available.

median- The median falls in the lowest interval of an open-ended distribution (for example "2,500-")

median+ The median falls in the highest interval of an open-ended distribution (for example "250,000+").

** The margin of error could not be computed because there were an insufficient number of sample observations.

*** The margin of error could not be computed because the median falls in the lowest interval or highest interval of an open-ended distribution.

***** A margin of error is not appropriate because the corresponding estimate is controlled to an independent population or housing estimate. Effectively, the corresponding estimate has no sampling error and the margin of error may be treated as zero.
