

S2302: EMPLOYMENT CHARACTERISTICS OF FAMILIES
Universe: None
2022 American Community Survey, 1-Year Estimates Subject Tables

	Total		Percent		Alaska		Percent Families with own children under 18 years	
	Estimate	Margin of Error	Estimate	Margin of Error	Families with own children under 18 years		Estimate	Margin of Error
					Estimate	Margin of Error		
Families	175,789	±4,082	175,789	±4,082	76,129	±3,130	76,129	±3,130
EMPLOYMENT STATUS CHARACTERISTICS								
Opposite-sex married-couple families	128,443	±4,138	128,443	±4,138	50,125	±2,785	50,125	±2,785
Both husband and wife in labor force	66,711	±3,980	51.9%	±2.3	32,341	±2,430	64.5%	±3.6
Husband in labor force, wife not in labor force	27,061	±2,361	21.1%	±1.8	14,797	±1,934	29.5%	±3.4
Wife in labor force, husband not in labor force	11,808	±1,779	9.2%	±1.3	2,223	±700	4.4%	±1.4
Both husband and wife not in labor force	22,863	±1,970	17.8%	±1.6	764	±304	1.5%	±0.6
Other families	46,278	±3,091	46,278	±3,091	25,508	±2,661	25,508	±2,661
Female householder, no spouse present	28,838	±2,564	62.3%	±3.5	16,191	±2,186	63.5%	±5.2
In labor force	22,193	±2,370	48.0%	±3.4	14,193	±2,083	55.6%	±5.1
Not in labor force	6,645	±1,028	14.4%	±2.3	1,998	±612	7.8%	±2.4
Male householder, no spouse present	17,440	±1,977	37.7%	±3.5	9,317	±1,610	36.5%	±5.2
In labor force	13,271	±1,797	28.7%	±3.2	8,134	±1,576	31.9%	±5.2
Not in labor force	4,169	±912	9.0%	±2.0	1,183	±492	4.6%	±1.9
WORK STATUS CHARACTERISTICS								
Families	175,789	±4,082	175,789	±4,082	76,129	±3,130	76,129	±3,130
No workers in the past 12 months	23,917	±2,062	13.6%	±1.2	2,985	±826	3.9%	±1.1
1 worker in the past 12 months	54,920	±2,776	31.2%	±1.5	29,952	±2,620	39.3%	±2.6
2 or more workers in the past 12 months	96,952	±3,912	55.2%	±1.7	43,192	±2,362	56.7%	±2.8
Married-couple families	129,511	±4,096	129,511	±4,096	50,621	±2,785	50,621	±2,785
Householder worked full-time, year-round in the past 12 months:	66,520	±3,836	51.4%	±2.1	32,498	±2,460	64.2%	±3.0
Spouse worked full-time, year-round in the past 12 months	34,161	±2,848	26.4%	±1.9	16,236	±2,109	32.1%	±3.7
Spouse worked less than full-time, year-round in the past 12 months	16,902	±2,114	13.1%	±1.5	8,541	±1,387	16.9%	±2.6
Spouse did not work in the past 12 months	15,457	±2,023	11.9%	±1.5	7,721	±1,417	15.3%	±2.6
Householder worked less than full-time, year-round in the past 12 months:	28,456	±2,462	22.0%	±1.8	13,160	±1,663	26.0%	±3.0
Spouse worked full-time, year-round in the past 12 months	13,601	±2,277	10.5%	±1.7	6,663	±1,328	13.2%	±2.6
Spouse worked less than full-time, year-round in the past 12 months	8,945	±1,365	6.9%	±1.1	4,390	±1,006	8.7%	±2.0
Spouse did not work in the past 12 months	5,910	±923	4.6%	±0.7	2,107	±626	4.2%	±1.2
Householder did not work in the past 12 months:	34,535	±2,145	26.7%	±1.7	4,963	±889	9.8%	±1.7
Spouse worked full-time, year-round in the past 12 months	9,467	±1,375	7.3%	±1.1	3,369	±796	6.7%	±1.6
Spouse worked less than full-time, year-round in the past 12 months	4,951	±1,167	3.8%	±0.9	917	±354	1.8%	±0.7
Spouse did not work in the past 12 months	20,117	±1,711	15.5%	±1.4	677	±296	1.3%	±0.6

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, the decennial census is the official source of population totals for April 1st of each decennial year. In between censuses, the Census Bureau's Population Estimates Program produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.

Information about the American Community Survey (ACS) can be found on the ACS website. Supporting documentation including code lists, subject definitions, data accuracy, and statistical testing, and a full list of ACS tables and table shells (without estimates) can be found on the Technical Documentation section of the ACS website. Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Source: U.S. Census Bureau, 2022 American Community Survey 1-Year Estimates

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.

Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to Labor Force Guidance.

Starting with 2013 data products, same-sex married couples are shown along with all married couples. For more information, see: User Notes.

Selected labor force, employment, and work-status estimates for same- and opposite-sex married people using 2020 American Community Survey (ACS) 1-year data are available for the nation, states and the District of Columbia, and for selected metropolitan areas. At the national level, estimates are available by sex, race, and Hispanic origin. For more information, see the "Employment and Labor Force Characteristics for Same-Sex and Opposite-Sex Married Householders and their Spouses: 2020" table package on the Labor Force Statistics webpage. □

The 2022 American Community Survey (ACS) data generally reflect the March 2020 Office of Management and Budget (OMB) delineations of metropolitan and micropolitan statistical areas. In certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB delineations due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on 2020 Census data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

- The estimate could not be computed because there were an insufficient number of sample observations. For a ratio of medians estimate, one or both of the median estimates falls in the lowest interval or highest interval of an open-ended distribution. For a 5-year median estimate, the margin of error associated with a median was larger than the median itself.

N The estimate or margin of error cannot be displayed because there were an insufficient number of sample cases in the selected geographic area.

(X) The estimate or margin of error is not applicable or not available.

median- The median falls in the lowest interval of an open-ended distribution (for example "2,500-").

median+ The median falls in the highest interval of an open-ended distribution (for example "250,000+").

** The margin of error could not be computed because there were an insufficient number of sample observations.

*** The margin of error could not be computed because the median falls in the lowest interval or highest interval of an open-ended distribution.

***** A margin of error is not appropriate because the corresponding estimate is controlled to an independent population or housing estimate. Effectively, the corresponding estimate has no sampling error and the margin of error may be treated as zero.
