Alternative 1: samme demografiske tendenser som hovedalternativ med uændret dødelighed i hele fremskrivningsperioden

Alternative 2: samme demografiske tendenser som hovedalternativ med lavere udvandring i hele fremskrivningsperioden

Alternative 3: samme demografiske tendenser som hovedalternativ med højere fertilitet i hele fremskrivningsperioden

Main alternative: baseret på demografiske tendenser med faldende dødelighed i hele fremskrivningsperioden, faldende fertilitet de næste 10 år, vandringsmønster på niveau med de seneste 5 års erfaringer, justeret, så perioden med Covid-19 ikke får indflydelse på beregningerne
