

B12002: SEX BY MARITAL STATUS BY AGE FOR THE POPULATION 15 YEARS AND OVER

Universe: Population 15 years and over

2023 American Community Survey, 1-Year Estimates Detailed Tables

		Alaska	
		Estimate	Margin of Error
Total:		587,506	±1,926
Male:		310,117	±2,035
Never married:		119,341	±7,598
15 to 17 years		15,967	±1,358
18 and 19 years		8,843	±1,561
20 to 24 years		23,870	±6,170
25 to 29 years		18,914	±1,931
30 to 34 years		14,373	±1,458
35 to 39 years		10,688	±1,741
40 to 44 years		5,878	±1,605
45 to 49 years		4,023	±1,001
50 to 54 years		3,606	±807
55 to 59 years		4,106	±989
60 to 64 years		3,995	±901
65 to 74 years		4,316	±1,018
75 to 84 years		738	±256
85 years and over		24	±31
Now married:		154,467	±6,928
Married, spouse present:		134,521	±5,046
15 to 17 years		0	±170
18 and 19 years		67	±109
20 to 24 years		3,652	±1,242
25 to 29 years		9,265	±1,857
30 to 34 years		11,208	±1,581
35 to 39 years		15,371	±1,997
40 to 44 years		16,187	±2,177
45 to 49 years		13,209	±1,478
50 to 54 years		11,165	±1,209
55 to 59 years		10,841	±1,456
60 to 64 years		13,361	±1,658
65 to 74 years		20,291	±1,455
75 to 84 years		8,527	±1,079
85 years and over		1,377	±485
Married, spouse absent:		19,946	±4,121
Separated:		4,624	±1,113
15 to 17 years		2	±2
18 and 19 years		0	±170
20 to 24 years		117	±149
25 to 29 years		189	±272
30 to 34 years		516	±399
35 to 39 years		644	±392
40 to 44 years		493	±477
45 to 49 years		286	±215
50 to 54 years		438	±276
55 to 59 years		540	±429
60 to 64 years		431	±232
65 to 74 years		853	±551
75 to 84 years		82	±73
85 years and over		33	±53
Other:		15,322	±4,135
15 to 17 years		0	±170
18 and 19 years		311	±2,546
20 to 24 years		769	±1,458
25 to 29 years		1,011	±417

30 to 34 years	836	±414
35 to 39 years	1,572	±750
40 to 44 years	2,348	±538
45 to 49 years	1,832	±671
50 to 54 years	1,358	±367
55 to 59 years	1,109	±368
60 to 64 years	1,650	±494
65 to 74 years	1,411	±362
75 to 84 years	1,064	±602
85 years and over	51	±13

75 to 84 years	4,104	±887
85 years and over	896	±434

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, the decennial census is the official source of population totals for April 1st of each decennial year. In between censuses, the Census Bureau's Population Estimates Program produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units and the group quarters population for states and counties.

Information about the American Community Survey (ACS) can be found on the ACS website. Supporting documentation including code lists, subject definitions, data accuracy, and statistical testing, and a full list of ACS tables and table shells (without estimates) can be found on the Technical Documentation section of the ACS website.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Source: U.S. Census Bureau, 2023 American Community Survey 1-Year Estimates

ACS data generally reflect the geographic boundaries of legal and statistical areas as of January 1 of the estimate year. For more information, see [Geography Boundaries by Year](#).

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see ACS Technical Documentation). The effect of nonsampling error is not represented in these tables.

Users must consider potential differences in geographic boundaries, questionnaire content or coding, or other methodological issues when comparing ACS data from different years. Statistically significant differences shown in ACS Comparison Profiles, or in data users' own analysis, may be the result of these differences and thus might not necessarily reflect changes to the social, economic, housing, or demographic characteristics being compared. For more information, see [Comparing ACS Data](#).

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on 2020 Census data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

- The estimate could not be computed because there were an insufficient number of sample observations. For a ratio of medians estimate, one or both of the median estimates falls in the lowest interval or highest interval of an open-ended distribution. For a 5-year median estimate, the margin of error associated with a median was larger than the median itself.

N The estimate or margin of error cannot be displayed because there were an insufficient number of sample cases in the selected geographic area.

(X) The estimate or margin of error is not applicable or not available.

median- The median falls in the lowest interval of an open-ended distribution (for example "2,500-")

median+ The median falls in the highest interval of an open-ended distribution (for example "250,000+").

*** The margin of error could not be computed because there were an insufficient number of sample observations.

*** The margin of error could not be computed because the median falls in the lowest interval or highest interval of an open-ended distribution.

***** A margin of error is not appropriate because the corresponding estimate is controlled to an independent population or housing estimate. Effectively, the corresponding estimate has no sampling error and the margin of error may be treated as zero.
