

NOTE. Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group guarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see Survey M

	Alaska		
	Estimate	Lower Bound	Upper Bound
Total:	25,088	22,062	28,114
1-person household:	4,365	2,870	5,860
Male householder	2,577	1,901	3,254
Female householder	1,788	704	2,872
2-or-more-person household:	20,723	16,469	24,977
Family households:	19,044	15,142	22,946
Married-couple family:	11,336	8,518	14,154
With own children under 18 years	5,990	4,657	7,323
No own children under 18 years	5,346	3,675	7,017
Other family:	7,708	5,071	10,345
Male householder, no wife present:	1,110	504	1,716
With own children under 18 years	796	243	1,349
No own children under 18 years	314	0	664
Female householder, no husband present:	6,598	4,085	9,111
With own children under 18 years	4,532	2,466	6,598
No own children under 18 years	2,066	1,470	2,662
Nonfamily households:	1,679	1,080	2,278
Male householder	1,239	617	1,861
Female householder	440	174	706

Notes

The 2002 American Community Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate is represented through the use of a confidence interval. The confidence interval computed here is a 90 percent confidence interval and can be interpreted roughly as providing 90 percent certainty that the true number falls between the lower and upper bounds.

The number of householders does not necessarily equal the number of households because of differences in the weighting schemes for the population and occupied housing units.

Click on the table title to access subject characteristics and code lists related to this table.

1. An '\*' entry in the lower and upper bound columns indicates that too few sample observations were available to compute a standard

error and thus the lower and upper bounds. A statistical test is not appropriate. 2. An <sup>\*\*\*\*</sup> entry in the lower and upper bound columns indicates that no sample observations were available to compute a standard error and thus the lower and upper bounds. A statistical test is not appropriate.

3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate.

4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '\*\*\*' entry in the lower and upper bound columns indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.

7. An '\*\*\*\*\*' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test is not appropriate.
