reproduction
rate

item Population 1 July, total From 1997 and onwards population on 1 July replaces mean population.

item Population 1 July, males From 1997 and onwards population on 1 July replaces mean population.

item Population 1 July, females From 1997 and onwards population on 1 July replaces mean population.

item Contracted registered partnerships The law on registered partnership entered into force on 27 June 1996.

item Contracted registered partnerships, two males The law on registered partnership entered into force on 27 June 1996.

item Contracted registered partnerships, two females The law on registered partnership entered into force on 27 June 1996.

item Judicial separations In addition two registered partnerships were dissolved in 1998, one in 1999, five in 2000.

item Dissolution of marriage, per 1,000 population In addition two registered partnerships were dissolved in 1998, one in 1999, five in 2000.

item Live births, per 1,000 females Women 15-44 years.

item Males per 1,000 females Mean population.

item Total fertility rate Fertility rates are calculated to provide the actual birth rates for a year or a period irrespective of the nation's age structure, which varies from one time to another. They are based on age-of-mother specific birth rates, i.e. the ratio between live births of mothers at a specific year of age and the mean population of women of that age.

item Gross reproduction rate Fertility rates are calculated to provide the actual birth rates for a year or a period irrespective of the nation's age structure, which varies from one time to another. They are based on age-of-mother specific birth rates, i.e. the ratio between live births of mothers at a specific year of age and the mean population of women of that age.

item Net reproduction rate Fertility rates are calculated to provide the actual birth rates for a year or a period irrespective of the nation's age structure, which varies from one time to another. They are based on age-of-mother specific birth rates, i.e. the ratio between live births of mothers at a specific year of age and the mean population of women of that age.
