These figures depict registered students in each type of school and are collected directly from the schools. The data include duplicate counts. Students can be counted more than once if they are registered in different schools, in different programs or in different modes of teaching at the same time. The coverage of the data collection has been expanded, especially between 2001 and 2002. Students in external learning are counted with students in day courses until 2000.

Year: 2004: In the dataset for 2004 the duplicate count is about 5% for all schools at both upper secondary and tertiary level.

Year: 2005: In the dataset for 2005 the duplicate count is about 5% for all schools at both upper secondary and tertiary level.

Year: 2006: In the dataset for 2006 the duplicate count is about 5.6% for all schools at both upper secondary and tertiary level.

Year: 2007: In the dataset for 2007 the duplicate count is about 5.6% for all schools at both upper secondary and tertiary level.

Year: 2008: In the dataset for 2008 the duplicate count is 6.0% for all schools at both upper secondary and tertiary level.

Year: 2009: In the dataset for 2009 the duplicate count is 5.8% for all schools at both upper secondary and tertiary level.

Year: 2010: In the dataset for 2010 the duplicate count is 5.0% for all schools at both upper secondary and tertiary level.

Year: 2011: In the dataset for 2011 the duplicate count is 5.4% for all schools at both upper secondary and tertiary level.

Latest update: 20160628

Reference period: 1997-2014
