n.i.e.: not included elsewhere

¹ Includes origins with total response counts of 15,000 or more for Canada.

² Respondents who reported multiple ethnic origins are counted more than once in this table, as they are included in the multiple responses for each origin they reported. For example, a respondent who reported "English and Scottish" would be included in the multiple responses for English and for Scottish.

 **Data quality note(s)**

- 1996 adjusted count; most of these are the result of boundary changes.
